Canyon length: 500m	**Highest rapell:** 12m	**Amount rapells:** 5
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 3 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Or ravine of Sen, as it is born of the lake of the same name. With a short access and immediate return and a descent with a permanent and abundant flow most of the year. Very well excavated and with deep sections, it forms gorges of great quality, in which there are waterfalls and projections with a lot of continuity.
Attention: There is a dam that regulates the flow of the Ibón. It is usually opened once a year, in order to fill the reservoirs at the end of the low water period. Ask at the town hall of San Juan de Plan.

Hydrology: (machine translated)
Several during the tour

Access: (machine translated)
We have to go to San Juan de Plan, for this we arrive at Ainsa and take the A138 towards France. After Lafortunada and before reaching Bielsa we will have a detour to the right to Salinas, Valle de Chistau, Gistain, etc.. We will go along this road and pass Plan and soon San Juan de Plan. In the village road makes a turn to the left and there is a street on the right that becomes a track, we follow it and cross the Cinqueta. The next bridge is the river Sen. We park.

Approach: (machine translated)
On the orographic right of the river Sen there is a path that goes up the riverbed in about 15-20min and leaves us on a concrete bridge, the beginning of the descent.

Tour: (machine translated)
Beautiful and little known descent. In many occasions we will find it empty. A very well formed and continuous fattened area awaits us after a small open stretch. It does not have jumps or big abseils but its great flow and boxing forces you to be continually attentive.

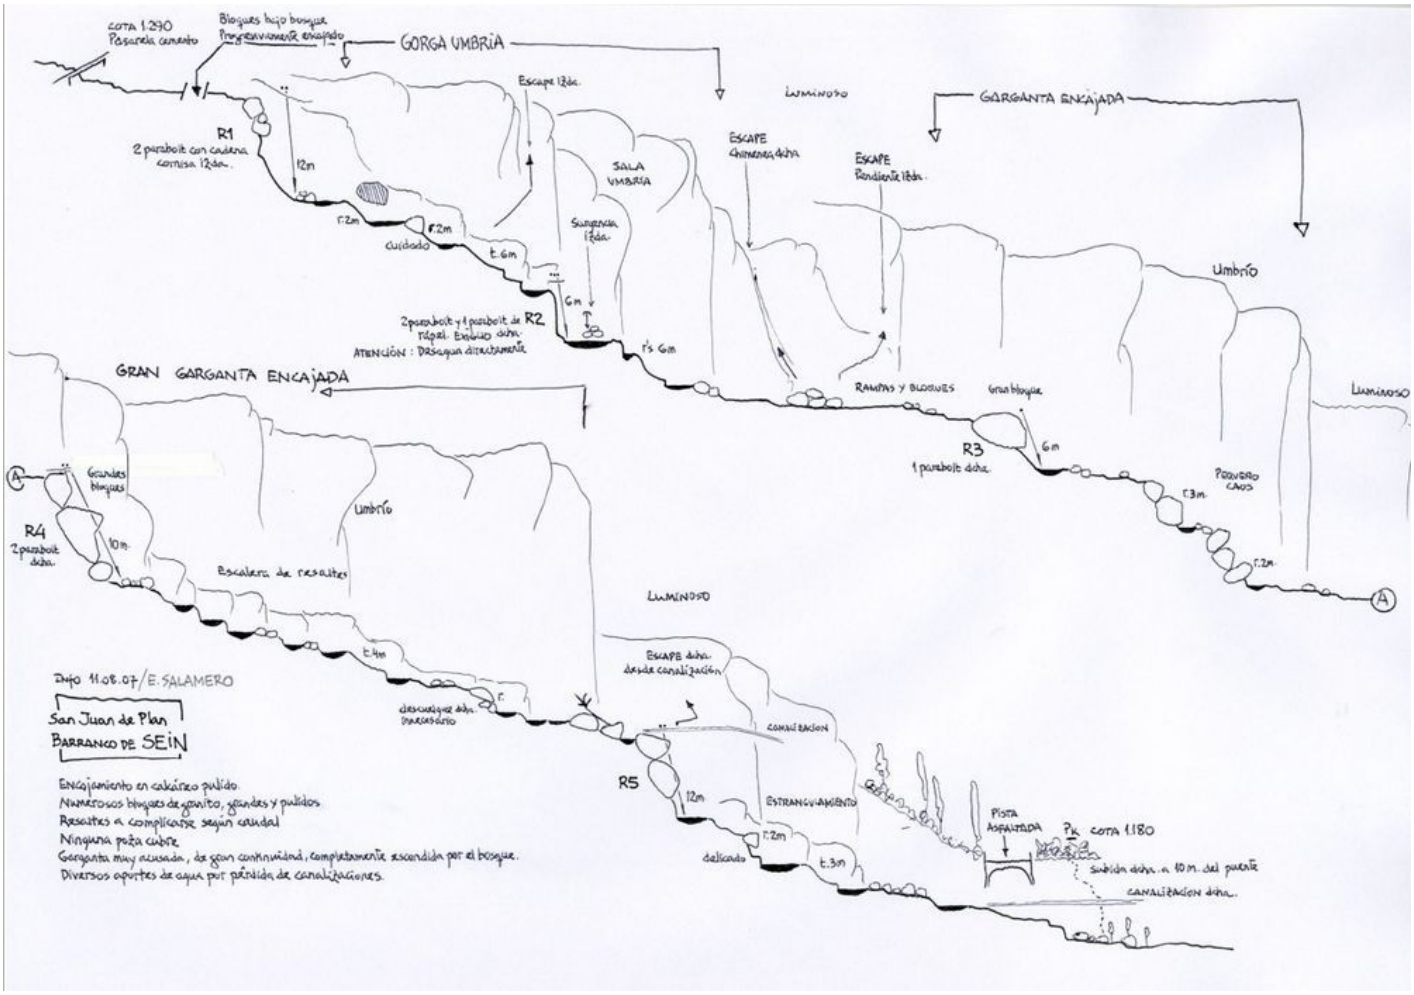

Return: (machine translated)
You reach the bridge

Coordinates:
Canyon Start 42.5948 0.3499
Canyon End 42.5927 0.3499
Unknown Parking 42.5926 0.3497
