| **Season:** January - December | **Orientation:** | **Best Time:** |
| **Rating:** ☆ 0 () | **Info:** ★ 0 () | **Belay:** ★ 0 () |

**Specialities:**

**Gear:**

**Summary:** (machine translated)
Large vertical and normally dry canyon, it has long rappels and the most significant is a 55-meter volao.
The ravine is used as a spillway for the hydroelectric power plant in case of emergency.
The descent is not recommended if the power plant is in operation.
The descent ends at the Poqueira River.
Evaluate the flow of the Poqueira river from the plant (especially in spring), since it is necessary to cross it and if it is loaded it is impossible.

**Hydrology:**
Ninguno

**Access:** (machine translated)
Take the A-44 exit 16. We continue on the A-348 to Órgiva and when we reach the village we turn left, A-4132 towards Pampaneira.
At pk 11, next to a house we leave the car to return.
We continue and cross Pampaneira. At the junction with the road to Bubión, parking at the gas station, we leave the other car.

**Approach:** (machine translated)
From the gas station descending towards the turret of the light, we must leave it to the left to avoid getting into the 2nd meeting. Be careful, the terrain is delicate

**Tour:** (machine translated)
Succession of waterless rappels with a 55m cantilevered rappel.

**Return:** (machine translated)
We end up at the Poqueira River, we must cross it and locate an irrigation ditch and a little marked path that will take us to the house at pk 11.

**Coordinates:**
Canyon Start 36.9325 -3.3646
