Summary: (machine translated)
Short descent but very interesting next to the Neste de Saux and not so demanding.
Attention dam with automatic water release system.
You can call before to the dam control to know the level. Phone: 0033671430848

Hydrology: (machine translated)
Two escapes, the first one in the open part and the second one before the waterfalls.

Access: (machine translated)
From Spain we arrive at Ainsa and take the A138 towards France. We cross the Bielsa tunnel and arrive in France on the D173. We pass the old customs (two sharp bends to the right and left) and continue almost to the junction with the road to Piau-Engaly. Shortly before the last sharp bend on the right there is a parking place.
From France in Lannemezan exit 16 of the A64 towards Arreau (Aragnouet-Bielsa) and follow the D939-D929 all the way to Saint Lary and Aragnouet-Bielsa. After Aragnouet we find the bridge over the Neste de Saux, cross it and continue until the first curve.

Approach: (machine translated)
By the track that goes uphill, soon crosses a stream that descends to the Gela. We arrived by some stairs and railing from which to rappel.

Tour: (machine translated)
Easy descent in summer and very complicated with high flow.

Return: (machine translated)
We will see some handrails
mounted on the right about 60-80m from the end of the ravine, which make you climb secured by a small channel very facilota until you reach a ladder that left you a few meters from the parking (5 min.)
Follow track with shortcut
