Chiriac

Le Chiriac

Rock type: limestone Orientation: Southeast	Drainage area: km² Best Time:
Rock type: limestone	Drainage area: km²
Highest rapell: 25m	Amount rapells: 11
Altitude exit: 950m	Delta Altitude: 200m
Tourtime: 2h55	Returntime: 35min
Grading: v3 a2 III	Total time: 4h15
gne-Rhône-Alpes Subregion: Savoie /	Savoy Town: Mercury
Update: 2024-10-05 16:50:27	Print: 2025-11-08 09:11:00
	gne-Rhône-Alpes Subregion: Savoie / Grading: v3 a2 III Tourtime: 2h55 Altitude exit: 950m Highest rapell: 25m

Specialities:

Gear:

Ropes: 1x30m+1x25m

Summary: (machine translated)

Alpine character, sequence of rappels in largely open terrain

Hydrology:

Access: (machine translated)

From Albertville, see google maps under Links

Approach: (machine translated)

see sketch and description book link "https://yd.marmitologue.net/topos/Chiriac.pdf" (apparently permitted by the author)

Tour: (machine translated) see description book link

Return: (machine translated)

See sketch and description in book link, if you cannot find the path to the right of the stream outlined in the book link, continue along the stream to the alternative exit on the left onto the forest path.

Coordinates:

Parking Entry and Exit 45.7149 6.3714

Canyon Start <u>45.7164 6.3561</u> Canyon End <u>45.7135 6.3588</u> Canyon End <u>45.7117 6.3614</u>

The canyon was okay. At the beginning, there was one spot where we would have liked to see a bolt, and in other areas, the bolts are placed in a way that creates a lot of friction. Further along, this improves, and the anchor points are in better condition. We didn't use the shuttle. We had a bit of trouble finding the correct path out of the exit straight away, but once you're there, it's easy to navigate back to the car with a map.
