Country: España / Spain **Region:** Valenciana, Comunidad / Comunitat Valenciana **Subregion:** Alicante
Town: Planes

Difficulty: not as difficult	**Grading:** v3 a1 II	**Total time:** 3h20
Approachtime: 15min	**Tourtime:** 3h	**Returntime:** 5min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: m	**Highest rapell:** 31m	**Amount rapells:** 12
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 2.8 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Also known as Barranco Cantacuc.
Generally dry ravine, after heavy rains can bring too many emotions (to be taken into account). It takes water almost as fast as it evacuates it so if we want to do it with water we will have to be attentive.

Hydrology:

Access: (machine translated)
CV700 to Catamarruc by CV7090, we go around the village to the south and when we leave the village we continue to the right.
At the next junction straight left and the next right (we will return to this point to go to P2).
Soon we will find a house on the left on a hill (we could leave the car in this area if the track is muddy and we do not have a 4×4). We descend to the watercourse and find the bed of the ravine, rather a wadi at this point. This is the P1 (This is where we will finish the ravine).
We take the second vehicle, return to the house and the second junction mentioned above and go to the right.
The track is in good condition, some steep sections, but also caution if it is muddy for normal vehicles. After a little more than 2k from P1 we reach a pass where we see a gap on the left for a couple or three cars squeezed together. This is P2.

Approach: (machine translated)
From the car (P2) we return by the track and continue to the left by the first path, very close to the parking lot. We flatten a little and descend... And about 300m from the car we turn left onto a path (3) that climbs up to the rope of the mountain. We see down there the bed of the ravine. We descend slightly to the left, there are some milestones, we look for the bed and we enter... We will find the pine of the R1.

Tour: (machine translated)
We will find rappels mostly of short length, being the longest of 22-23mts, this one called Pou de Jordi. Spectacular fall that can seem the shape of a long tube (considered by some the most beautiful in the province of Alicante).

Return: (machine translated)
We finish R11 and R12 and continue along the riverbed. After about 50 meters we will follow a path to the right that ascends to a field where there are two or three honeycombs. We continue, soon reach an old road and descend, leaving the riverbed to the left until we reach P1.
