Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 2.8 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Simple canyon with only 4 rappels to combine with Navedo.

Hydrology: (machine translated)
All along the route, it is a very open canyon.

Access: (machine translated)
Location of the Hermida ravines
From San Vicente de la Barquera or from Potes we take the N621 to La Hermida.
Cicera and Navedo ravines
We turn to the CA282 to Linares, we pass it and arrive at Piñeres. Here we turn right Cicera and the Mirador de Sta Catalina. In 1.5 kms we reach the village and park.
We also have the option to continue along the N621 to pk 159.5 that there is a parking lot on one side.

Approach: (machine translated)
From the village the access is almost direct, we go to the river and by the orographic left we go down until we see the marked access.
If we have parked in the gorge we will walk up the river along the road that goes up to Cicera until we reach the village. But this is 1h of walking.

Tour: (machine translated)
Easy descent with slides, skills and 4 rappels. The last one of 22m is beautiful. You can continue later and do the lower part but it has nothing technical.

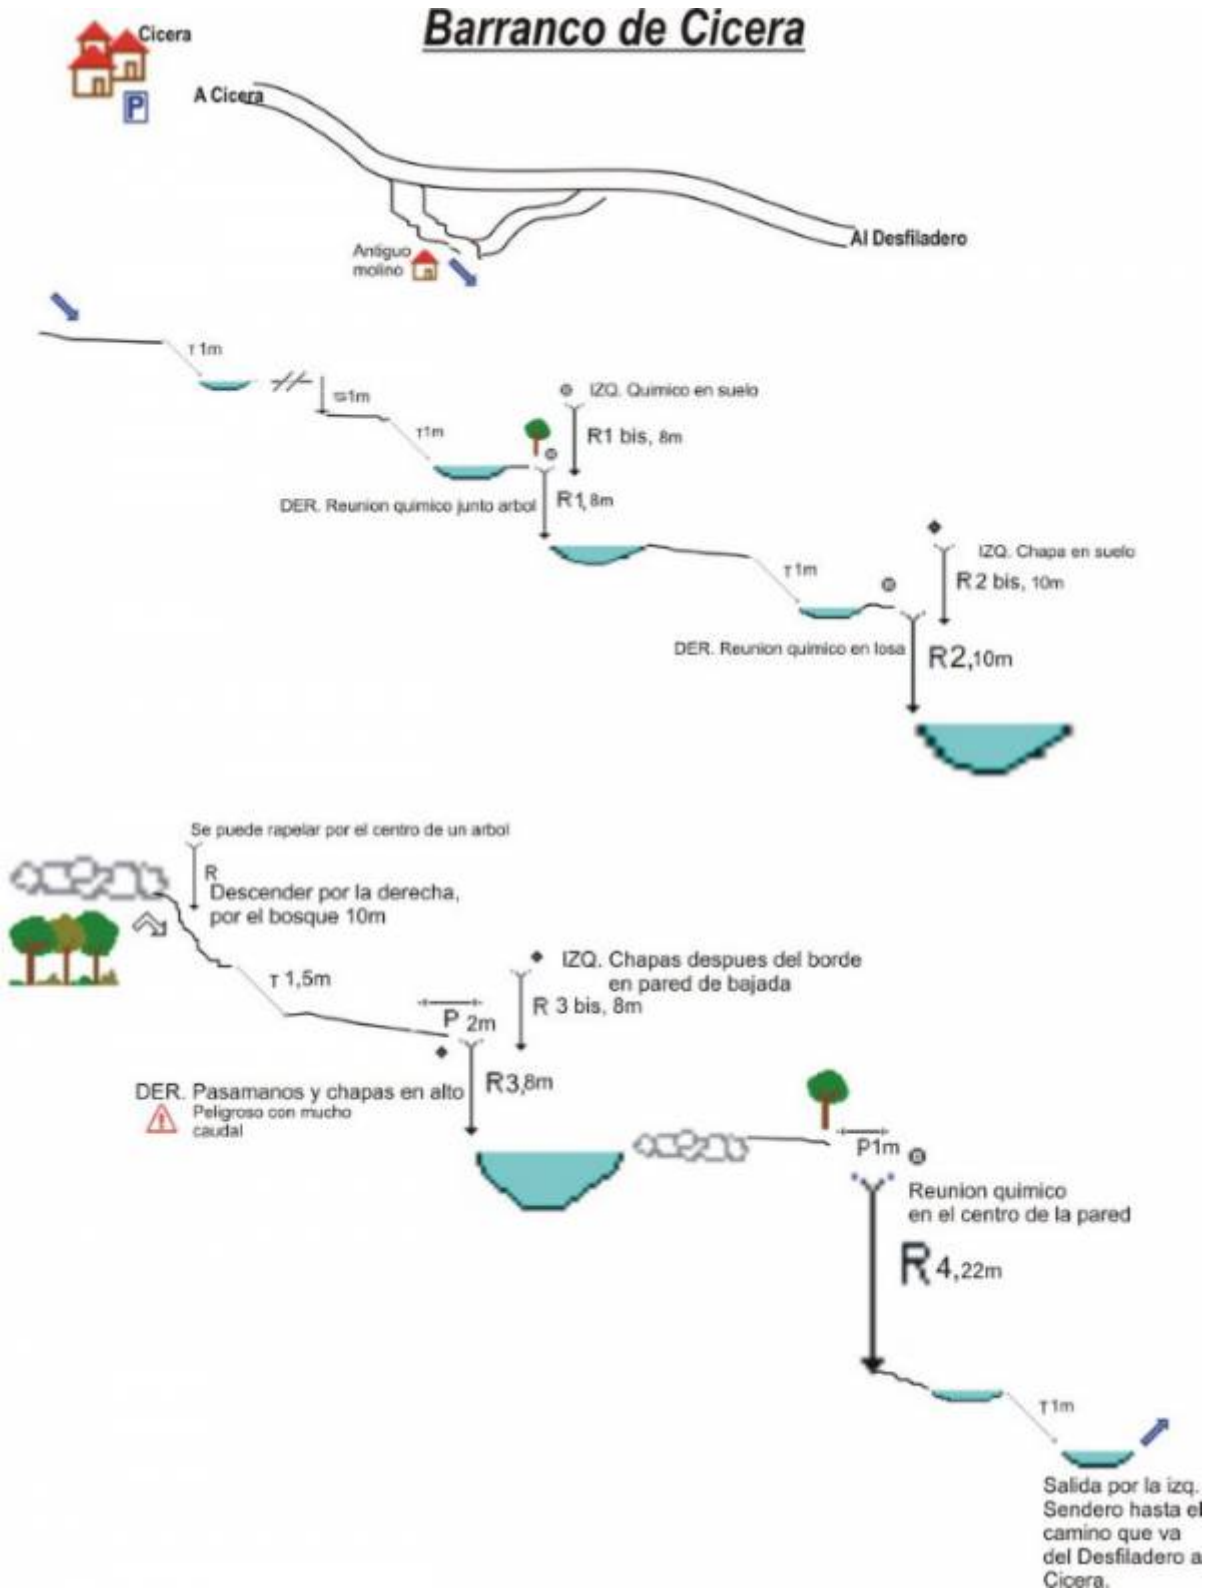

Return: (machine translated)
After the last projections we see the path on our left, we take it and go up to the village.

Coordinates:
Canyon Start 43.2333 -4.5500
