Ropes: 2x 80m

Summary: (machine translated)
Sequence of abseiling points with limited height.

Hydrology:

Access: (machine translated)
From ST DENIS, take the D49 towards Bois de Nèfles, continue to Piton Bois de Nèfles and continue to the exit of the road.

Approach: (machine translated)
Take the path in the direction of Roche Écrite. After about 1.5 hours of walking, shortly after passing Pic Adam, the path goes downhill again until it crosses the Ravine Bois de Nèfles.

Tour: (machine translated)
Sequence of abseiling points with limited height. Only an 80 m high waterfall provides some variety. Equipped with RD, after a 7 m long introductory abseil, it can be mastered with a length of 75 m and some friction, or EHC 11 m-21 m-41 m.

Several narrow sections without necessarily having to get out, but you can climb up the banks to safety if necessary.

There are already big differences from the last Ric to Ric topographic view, as it was recorded in 2006! Since then, the route has been re-equipped. In general, the old equipment on the trees is EHC and the relays are stainless steel.

Return: (machine translated)
Exit at the drainage system and follow the path that leads to the GR access path.
