## Specialities:

Gear:

Ropes: 2x 40m

**Summary:** (machine translated)

Rappel canyon with many smaller steps, nicely continuous and without getting too technical.

**Hydrology:** (machine translated)

Lots of vegetation in the catchment area, you should wait a few days after heavy rain. Should not be entered if the measuring station at Brenno still has over 5 cubic meters.

Access: (machine translated)

There is not much space to park directly at the top, so perhaps it is best to stop at the bends before the turn-off.

**Approach:** (machine translated)

At the bridge at 1009m you can walk down into the streambed, and in a little more than 100m the canyon begins.

**Tour:** (machine translated)

The canyon actually has the same ambience throughout. Small steps rappeling in the water, in a constant 10-30m gulch. An emergency exit is often possible every 5 rappels (even if it is often steep up the slope). There are three larger waterfalls during the tour, with the very large one being the crux of the tour.

**Return:** (machine translated)

You can park right by the bridge at 618m and walk well out of the streambed. The last 2 steps under the bridge are nothing special and after that you end up in nowhere.
