## **Specialities:**

## **Gear:**

## **Summary:** (machine translated)

Rappel canyon with hot water

## **Hydrology:**

### **Access:** (machine translated)

Leave the A-9 'la Languedocienne / la Catalane' (Montpellier-Barcelona) at exit 42 near Perpignan (Perpignan South) and a few km further north take the N-116 towards Prades. Drive past the town (52 km from the A-9) and after another 16 km through Olette. 4 km after Olette, cross the Têt to the orographic right. The thermal station of Thues-les-Bains, the starting point for the tour, is on the left and parking your vehicle here becomes a problem: either on the private grounds of the thermal station - only with the prior consent of the operators - or a few hundred meters up the valley in a parking bay on the edge of the D-116 (when walking back to the thermal station you can see the final waterfall from the D-116).  
Parking on the D-116 is strictly prohibited in the vicinity of Thues-les-Bains! A recommended alternative is to take the 'train jaune' (yellow train). It runs through the entire Têt valley and also stops directly in Thues-les-Bains. In summer, riding in the open carriages is an experience in itself.

### **Approach:** (machine translated)

From the bridge, the trail climbs slightly over the grounds of the thermal station up to the railroad station. Cross the tracks here. Immediately after the tracks, the path turns right and climbs gently and evenly up the slope above the tracks. You turn into the Fajet valley and soon reach the stream below a fenced-in water catchment.

### **Tour:** (machine translated)

The Fajet is fed by numerous steaming thermal springs and the water has a temperature of 55° C in the pot under the 2nd abseil point. (especially for 'hot showers'!). You can only bathe here because cold water is supplied via a plastic pipe.

### **Return:** (machine translated)

After crossing under the road, turn right and as soon as possible right up to D-916 (lean part of the stairs against the wall!).

Automatisch importiert von Descente-Canyon.com für Canyon Fajet & Eaux Chaudes Juste eau chaude, petit canyon sympa en complément du llech fait le matin. On s'est garé juste avant la barrière des MAS sans gêner. Le début de l'approche se fait juste avant les bâtiments à droite 100 m après la barrière. Ensuite il faut monter et passer la voie ferroviaire. Ensuite 5 min de montée et prendre le chemin qui amène au cours d'eau (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/230/observations.html>)

The water is quite hot in some places. Be careful. Some okay rappels, but not really interesting.

Automatisch importiert von Descente-Canyon.com für Canyon Fajet & Eaux Chaudes Fait Fajet en montant par le départ d'eau chaude. De tous les canyons qui nous a été donné de faire, Fajet est dans notre top 1 des canyons les plus pourris. Une marche d'approche horrible, un canyon sans intérêt, même s'il y avait eu plus d'eau. On déconseille vivement. Ce canyon devrait être séparé d'eau chaude et aurait un vote de 1/5. Eau chaude vaut le coup pour la température de l'eau exceptionnelle. Automatisch importiert von Descente-Canyon.com für Canyon Fajet & Eaux Chaudes Fait ce matin, ça fait plaisir de revenir en canyon après des complications. Eau bien chaude. Stationnement et sortie toujours problématique. Et je suis toujours en double dans les photos, deux fois moi ? haha (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/230/observations.html>)
