Specialities:

Gear:

Summary: (machine translated)
Initiation canyon, playful in its first part when the flow is weak. If there are releases in the dam as in spring, it can be a very dangerous descent.

Hydrology: (machine translated)
In the first part, up to R12 on the right side very easy. In fact, almost all the rappels/jumps can be avoided.

Access: (machine translated)
From Tarbes we head towards Lourdes on the N21. Then we continue towards Gavarnie-Gedre on the D821. Continue towards Gavarnie-Gedre on the D921 to Gédre and from here to Gavarnie. Almost at the entrance of the village we have a detour to the right towards the tracks. We take it and in a sharp bend to the left, we have the signs to Barrage d'Ossoue 8km. Here we park

Approach: (machine translated)
On the road to Ossoue we go up about 150m and we will see a path that goes down to an old footbridge, we go down and enter the riverbed.

Tour: (machine translated)
Simple and fun descent full of jumps.

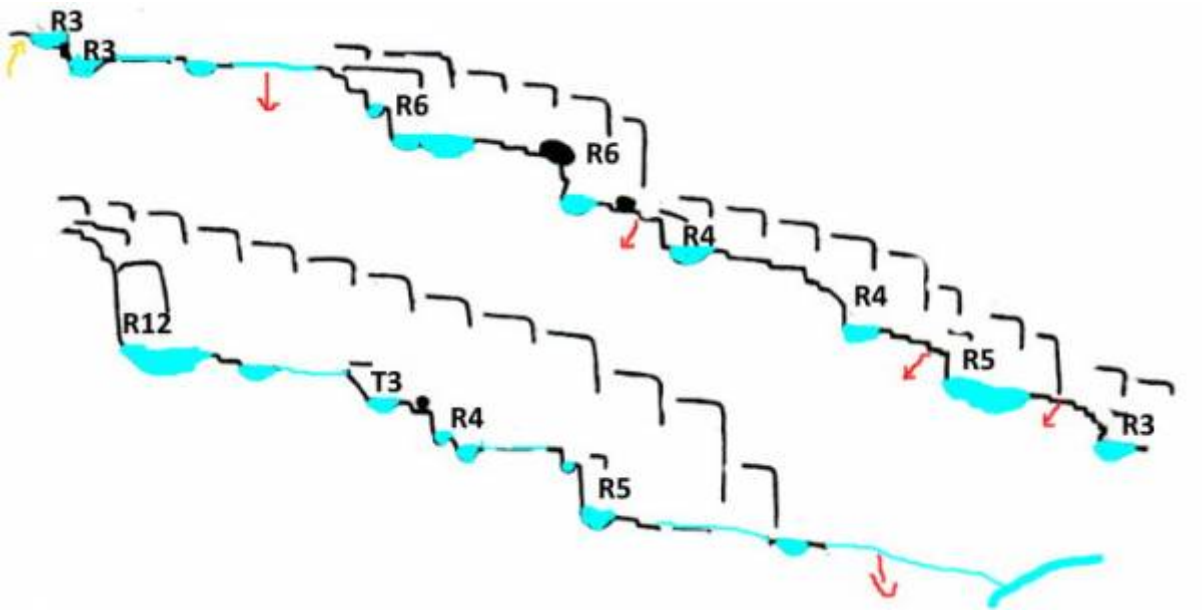

Return: (machine translated)
After the last rappel and before reaching the Gave de Gavarnie we will see a path on the right that takes us up to a footbridge. This path leads us to the road to Gavarnie. We go back to the car.
