Ropes: 10m-Notseil

Summary: (machine translated)
Hiking in Themalwasser with a climbing spot (no longer possible in 2019 as the clamping block has been pushed out)

Hydrology:

Access: (machine translated)
We drive from the town of Karak on the "50" down to the Dead Sea. After 26.2 km we come to the T-junction "Mazra Junction", turn right onto the "65" heading north and after 25.4 km pass the bridge over the Mujib and then after 38.3 km (from Mazra Junction) we come to the concrete structure in Wadi Kusheiba.\nFrom the north (Amman, Madaba) it is 8.8 km from the T-junction of the "65" with the road coming down from Madaba to Wadi Kusheiba.

Approach: (machine translated)
Over the concrete structure directly into the stream.

Tour: (machine translated)
We walk and climb up (via small steps) in the thermal water. At the exit of the gorge, we come to an approximately 4m high waterfall (no longer available as of 2019), which can be climbed through the adjacent stalactite grotto. At the top, the stream is largely open and therefore less interesting.

Return: (machine translated)
Back on the approach route.
A connection with the Wadi Attun would be possible (the latter then on the descent)
