Country: España / Spain **Region:** Cataluña / Catalunya **Subregion:** provincia de Lérida / Provincia de Lleida
Town:

Difficulty: a little difficult	**Grading:** v4 a2 III	**Total time:** 3h2
Approachtime: 1h	**Tourtime:** 2h	**Returntime:** 2min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 1300m	**Highest rapell:** 35m	**Amount rapells:** 13
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Also called Comaplana (Coma Plana) because of its birthplace, although the more correct toponymy is the name of this alpine torrent, with water almost all year round, in summer it can dry out but quickly picks up water with any storm or shower that falls in the area.
Somewhat precarious or adventure facilities, in a wonderful environment, on the Vall Fosca and with fantastic views. If we do it in spring we will be able to find it with a good flow although somewhat cold.

Hydrology: (machine translated)
On part of the way up the mountain slopes

Access: (machine translated)
On the N260 between Pont de Suert and La Pobla de Segur, at the height of Senterada we turn off on the L503 to the Torre de Cabdella. We will continue along the same road to the village of Cabdella, cross it, cross the Flamisell and continue along the road about 2kms to some forks, in the second left, very closed with a high guardrail, is the parking Ricossanto, we will continue about 300m to the next stream, a few meters before we have room to park. With the access car we continue to the dam and cross it to park in the parking lot on the other side.

Approach: (machine translated)
Banks Ricossanto, Valldomars and Pigolo
We will leave in the direction of Estany Gento, quite steep path on the orographic left of the Canal de Pigolo, great views of the Vall Fosca, the cirque and the reservoir until we reach the greenway, old wagon track, here we will go to the right, cross two small tunnels and continue. Along this path it is about 1.5 km until you reach our torrent.

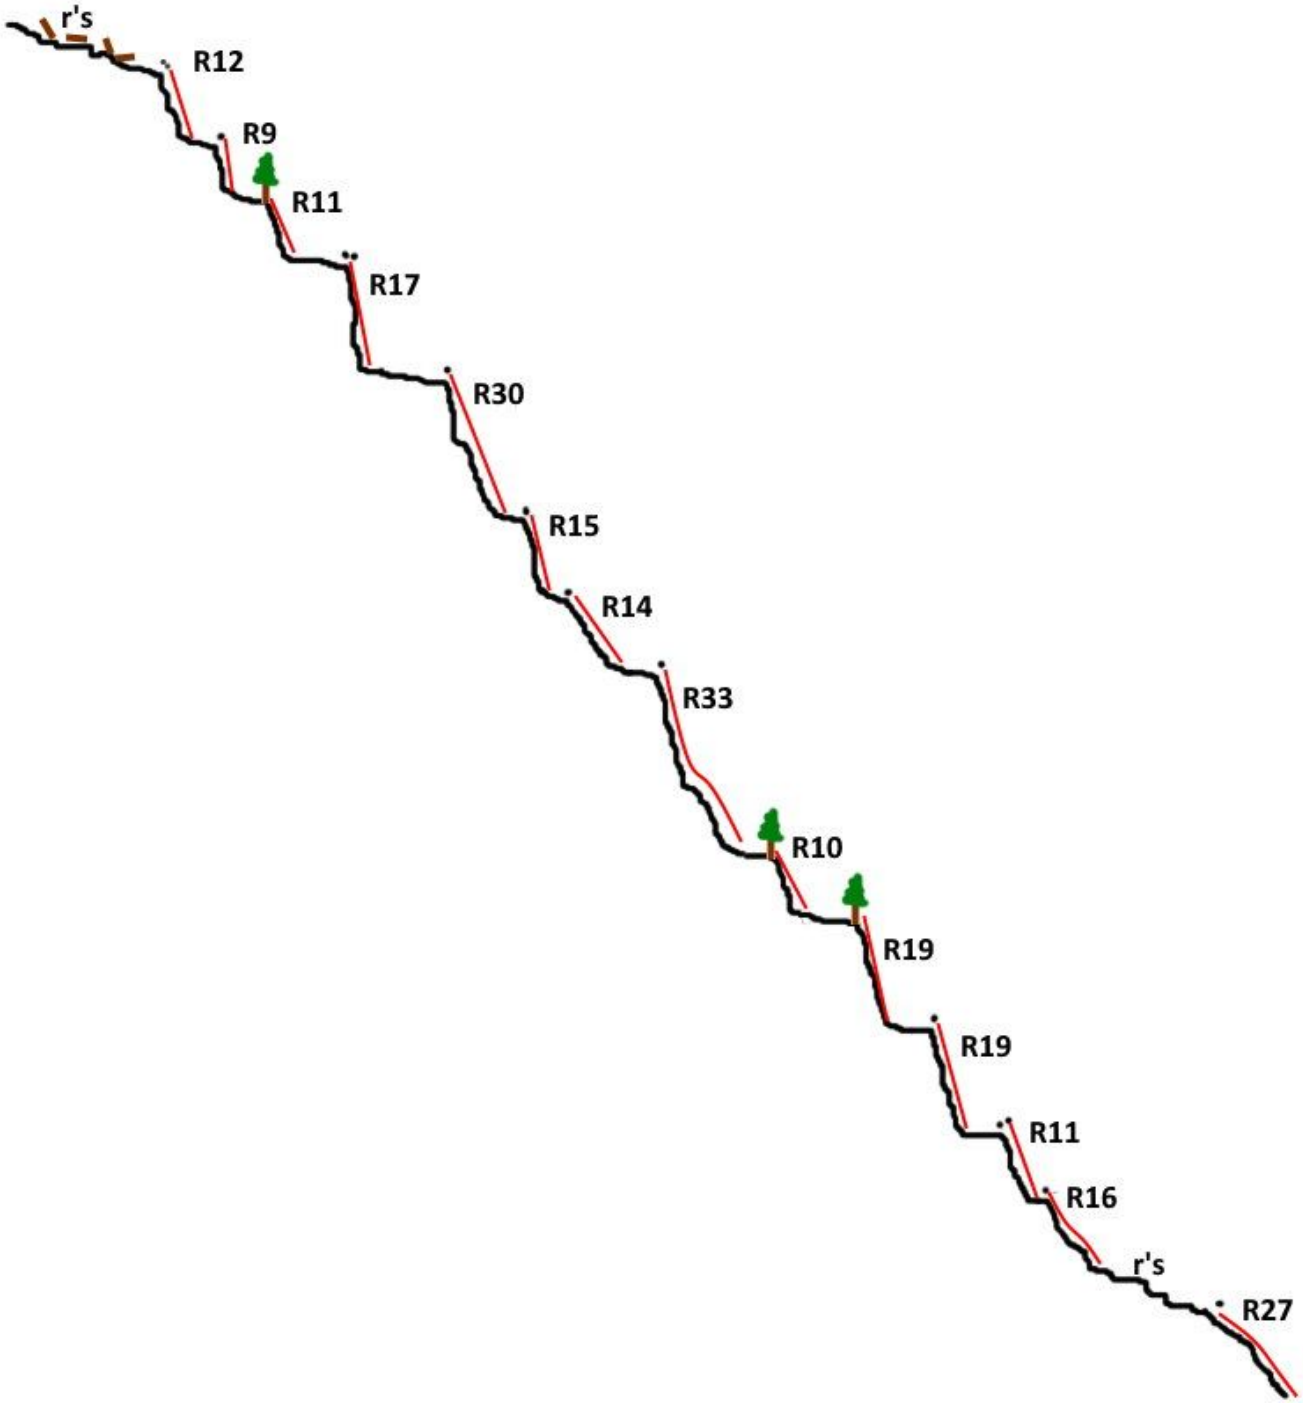

Tour: (machine translated)
A first part with some dexterity and without greater interest until almost the confluence with a tributary on the left, from here the rappels will follow each other until almost the road.
We will not find big fattened sections but small boxed zones in which the force of the water in spring will make us to be very attentive.

Return: (machine translated)
Immediately on the road
