Summary:

Hydrology: (machine translated)
Evident by the approach road that crosses the ravine.

Access: (machine translated)
We will drive along the C-13 to Llavorsi, cross the town and continue along the C-13, after a few kilometers we will turn right towards Estaron. We will continue about 300 m. and just before the first sharp bend to the right we will leave the first vehicle.
With the second car (or on foot in case of going with only one vehicle) we will continue along the track, and in the second sharp turn to the right that we find (not counting the first parking) we will park.

Approach: (machine translated)
Already on foot we will take the path that comes out of the same curve, we will cross two streams before reaching the Estaron. We can start the ravine at this point. If we want to do the upper part we will cross the ravine and continue along the path until it disappears where we will go down to the riverbed.

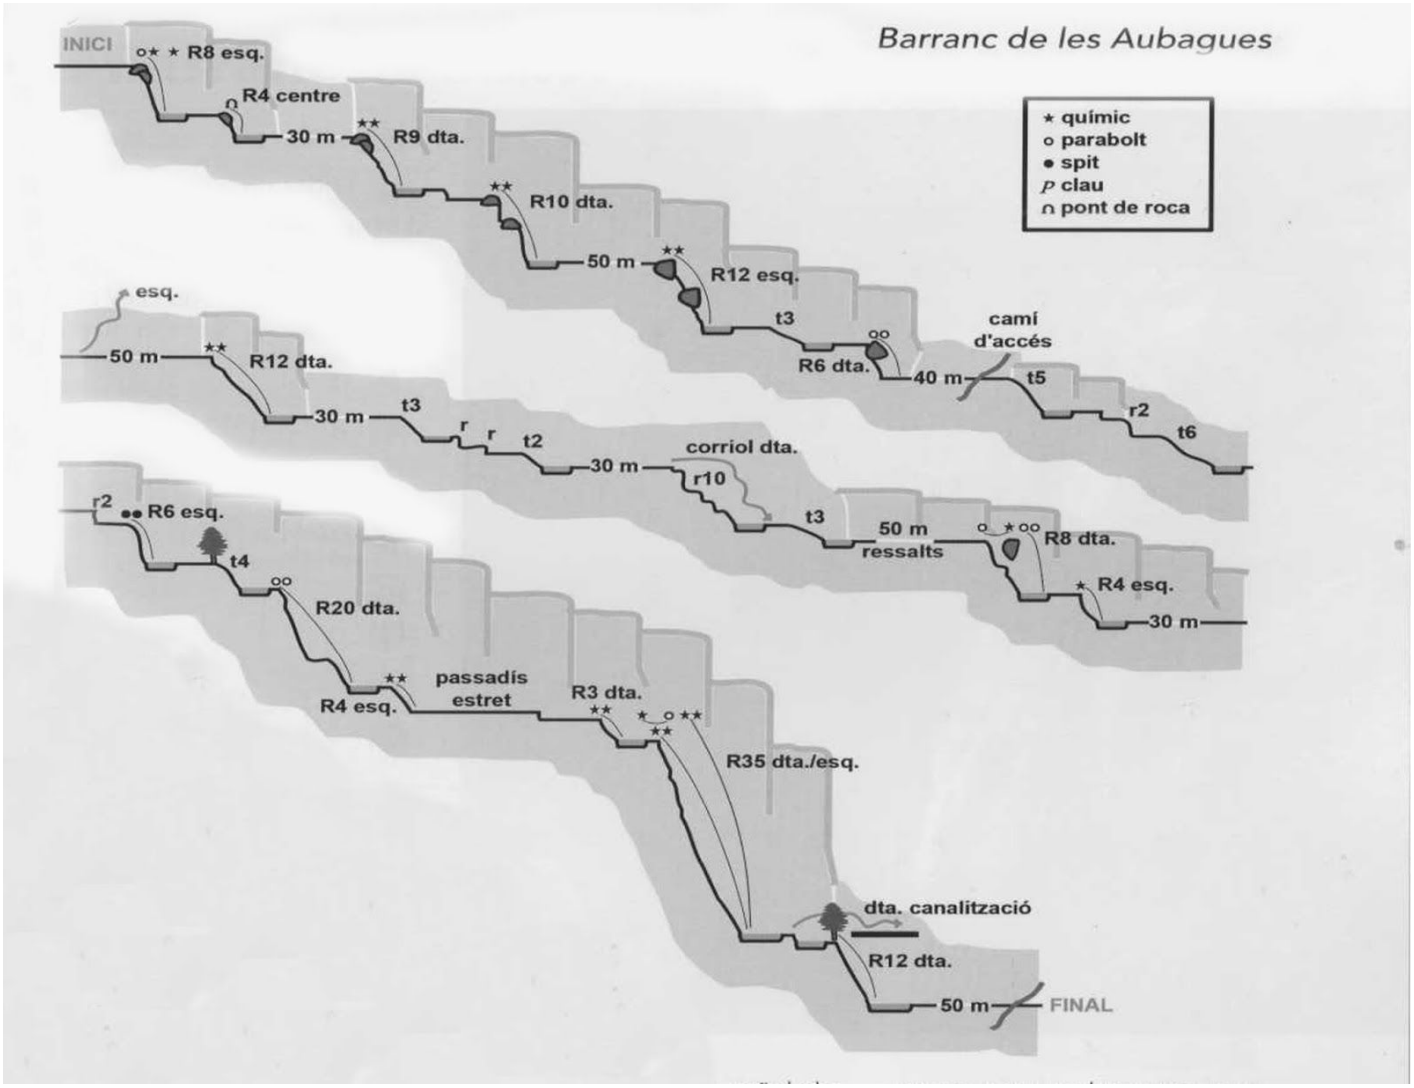

Tour: (machine translated)
Canyon with very slippery rappels. The upper part is better formed, then the riverbed opens up quite a bit.

Return: (machine translated)
Once we have descended the 35 rappel, we will take a channel to the right that will take us to a path that will lead us to the car.
