Automatisch importiert von Descente-Canyon.com für Canyon Sorico Late in the afternoon, after checking a few canyons that were not possible because of the heavy rain of the last days. Minimalistic anchors and sometimes on a wired place.If there would be less rubbish and less fallen trees the canyon would be a lot more interesting. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/23783/observations.html)

A canyon that could be pretty, but the intestines left as decoration and the wood spoil the atmosphere a bit. The anchors are old, but beware. Towards the end, from the cascade de Sorico onwards, anchorages become scarce, so we improvised a little... (machine translated)

At the exit of the first rappel, tree trunk with root and branches, intermediate stand due to brown algae and formerly existing, now missing knot sling not safely accessible, we orographic right with 60 meters rope past. We couldn't collect the carpet, drinks crates and all the plastic bags Luckily we didn't see any dead animals. (machine translated)

Alternative in case of rain. Water level safe. The stands are generally okay, one stand is relatively difficult to reach and there is a risk of falling if the rock is very slippery. Unfortunately a lot of garbage in the canyon (animal carcasses in plastic bags, etc.)! (machine translated)
