Summary: (machine translated) Raw data import from Ropewiki https://ropewiki.com/Frunden_(West)		
A canyon with one of the best views imaginable. Still, there are some rappels in narrow parts, with fairly concentrated jets of water. (machine translated)		
Hydrology:		
Access: (machine translated) Park in Kandersteg.		
Approach: (machine translated) Take the gondola up, or walk (or ebike) to the lake. And then over the Fründeschnur towards Fründenhütte. At about 2000m turn right and head up to the plateau where both Fründen falls start. West is now established up to an altitude of 2140m.		
Tour: (machine translated) Again and again gulches in very beautiful limestone. The 60m does not look as high as it is from above.		
Return: (machine translated) There are different variants depending on how far down you go.

2022-10-29 Bubtore ★★★★★ 📁 ★★★ ⚓ ⚓ Low 🎉 Completed Beautiful views, and beautiful gulches, but almost no water at this time of year. We have drilled up to 2140m, there would still be a step between 2180m and 2140m, which I think should also be achievable if someone wants to hang on. (machine translated)
