Summary: (machine translated)
O Sordials is an interesting canyon if you are in the area. It has two parts, the upper one very aesthetic, continuous but short, then we will have an open section and then the lower one, much longer and with more height in its rappels.
Caution with the spring flows / thaw.

Hydrology: (machine translated)
In open areas, yes. In the gorges hardly

Access: (machine translated)
We are located in Ainsa (N260), we will take the A138 towards France through the Bielsa tunnel. After a few kilometers we will pass through Labuerda and at pk57 we arrive at Escalona. We will continue towards France passing through Lafortunada until the detour to the valley of Chistau/Gistaín (A2609).
After passing Saravillo and before the tunnels we have the detour to Sin on the left. We will take this road and go up to the village, just before arriving we have the detour to the left to Serveto, which surrounds the village of Sin, at the exit we find the bridge over the ravine and here we can park.

Approach: (machine translated)
Before the bridge, about 60m, if we go uphill to the left we have a path that goes up to the headwaters of the river by a path that at times is lost.
Through a meadow the path goes up until it reaches an open area of the ravine where it crosses, this is the access to the lower part.
If we cross the riverbed and follow the pipes to the top of these pipes where the first rappel is located.
A short rappel Jabalinada, of long pants, between gorges.

Tour: (machine translated)
We will have a very aesthetic first part with its whitish waters where we will find 4 rappels.
We will continue along the wall until we can get out to a path that leads us to the path of ascent and to the open part where we will enter to do the lower part.

Return: (machine translated)
We arrive at a small wooden bridge with a path where we will go up to Sin
