Country: España / Spain **Region:** Aragón **Subregion:** Huesca **Town:** Rodellar		
Difficulty: a little difficult	**Grading:** v4 a2 III	**Total time:** 6h40
Approachtime: 2h20	**Tourtime:** 3h30	**Returntime:** 50min
Altitude entry: 1050m	**Altitude exit:** 780m	**Delta Altitude:** 270m
Canyon length: 400m	**Highest rapell:** 40m	**Amount rapells:** 7
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 3.6 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 2x45

Summary: (machine translated)
Dry rappel, in Mascun superiore then usually with water throughput

Hydrology:
Posibles hasta el primer rápel

Access: (machine translated)
On the N-240 from Lleida or on the A-138 from France through the tunnel of Bielsa via Ainsa to Barbastro. On the ring road around the city and continue on the N-240 towards Huesca. About 22 km after Barbastro we turn right onto the A-1229. Via Abiego and Bierge (turn left after Abiego) we arrive at Rodellar (about 30 km from the turnoff from the N-240).

Approach: (machine translated)
At the entrance to Rodellar, we go down to the right between the stone pillar and the bar and up to Cheto via the mostly dry stream on the opposite slope. We follow the signs that lead us to the Bco. Virgen a little below the confluence of Bco. San Martin and Bco. de Las Tablas. We move up the other side of the slope in a northerly direction. After a slight left turn at the top of the small plateau (1 hour walk), we can enjoy a panoramic view of the Bco. Since the tracks are lost here, we keep going up (about 90 degrees to the right) in the direction of ONO over the wide ridge until we come across a transversal track. We follow the track that leads us at about the same altitude above the wide cirque of the Canal d'Esplucacasa that descends towards Mascun, to a boulder field (total 1.5 hrs) that narrows further down to Bco. Here we leave the track, descend the boulder field on the right edge for about 80 m until we meet a path that branches off to the right. Through a sparse wood (the trees are not very high) we go first in a northerly, later in a westerly direction to the plateau. There the path - at first hardly recognizable as such - leads in a northeasterly direction, later in a northerly direction and then over a small saddle. Behind this, the path descends again in an easterly direction to the bed of the Bco. Fornazos (2 hrs. in total), crossing its two arms one after the other. Heading NNW again, the trail continues to a small yoke with the remains of an old pen. Behind it, the trail descends in a NNO direction on partly indistinct tracks into the left arm of the Bco. d'Os Cochas (up to here approx. 2.5 hrs. from Rodellar). In the streambed it goes in about 20 min. to the first rappel point.

Tour: (machine translated)
At the beginning dry rappel in a relatively open chute, Then the longer rappel down into the Mascun and finally in the Mascun even down.

Return: (machine translated)
The Bco. d'Os Cochas flows into the Mascun superiore at the Oscuros de Otin. Over 5 rappels it goes down into the Mascun inf., in this - largely on trails, without further rappel - out and left up to Rodellar to the car (about 2 hours from the last rappel in the Mascun sup.).

Coordinates:
Canyon Start 42.3197 -0.0517
Canyon End 42.3205 -0.0609

Automatisch importiert von Descente-Canyon.com für Canyon Os Cochás La marche d'approche est plus simple que la description n'en donne l'air. Depuis Rodellar suivre la piste qui part vers la Virgen, et suivre les panneaux qui, régulièrement, indiquent Las Bellostas. Le chemin est ponctué de traces blanc et rouge. La description des lieux parcourus est correcte (col, A Glera, etc.) mais peu de risque de se tromper en suivant les panneaux. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21347/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Os Cochás Équipement au top et non relié. Nous n’avions pris qu’un litre d’eau car il y avait des résurgences d’eau potable peu après le tronc. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21347/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Os Cochás Sec, mascun en eau et conditions parfaites. Relais OK, très bonne journee (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21347/observations.html)

2023-10-31 | System User | |🕮 |⚓ | 〰 Dry | 👎 Not done
Automatisch importiert von Descente-Canyon.com für Canyon Os Cochás les coordonnées de l'os cochas données par zed le 24 avril 2016 sont bonnes mais il faut juste mettre -0.05172 et non 0.05172 sinon c'est ok (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21347/observations.html)

2023-10-14 | System User | |🕮 |⚓ | 〰 Dry | 👍 Completed
Automatisch importiert von Descente-Canyon.com für Canyon Os Cochás très beau parcours ne pas s'éterniser à prendre le raccourcis après le coral mais suivre le chemin jusqu'au croisement et début de canyon. L' os cochas, pas de difficultés bien vérifier l'état de la cordelette du premier rappel de 25m le reste c'est ok ,un peu longué en revanche dans le Mascun avec passage délicat sans eau la remontée sur corde s'impose à deux avec courte échelle sur une marmite sèche au deux tiers du mascun, au delà du beso encore de gros blocs et final tranquille jusqu'a Rodellar plutôt 11heures quand on a plus de 60 ans (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21347/observations.html)
