Summary: (machine translated)
Rappel canyon in rugged terrain

Hydrology:

Access: (machine translated)
From St. Johann/Tyrol 13.5 km on the 312 in the direction of Lofer, then turn right to Waidring and continue south in the direction of Pillersee. About 4 km after Waldring - before reaching the Pillersee - the road crosses to the right over the river. Immediately before the bridge on the left a larger parking lot, costs 2€/day (as of 06/18) - park your car here (820 m above sea level). \nAccessible also from Kössen or Bad Reichenhall via Lofer.

Approach: (machine translated)
Follow the sign Teufelsklamm (Devil's Gorge) up the forest road for about 40 minutes in a southeasterly direction until a short and pleasant access to the streambed opens up on the left (1040 m above sea level).\nGood to combine (on one day) with the short Taxabach.

Tour: (machine translated)
Largely open, some narrows, some rappel over bedload barriers. The stream is also used commercially, which is why the facilities are optimized (2011).\nGood to combine (in one day) with the short Taxabach.

Return: (machine translated)
After the last two bedload barriers, exit to the left.

Took the upper entry. Some anchors bounced down (from the high water) but each stand has at least one usable anchor. (machine translated)

Everything ok! Boarded from the wooden bridge with school class. So far everything passes! Low water level despite the rain! (machine translated)

After about 12 minutes of access, do not follow the signs to Teufelsklamm, but stay on the forest path. All belays ok (machine translated)

Decent water level after the rain, lower part accessible from the bridge. Pretty much covered in gravel. All ok (machine translated)

Lower part committed, everything ok (machine translated)

The lower part is, for my taste, way too commercialized. Steel ziplines and other stuff all over the place.

Only made the lower part, at the wooden bridge! Good water flow! No problems! Installations all in order. (machine translated)
