Summary: (machine translated)
Abseiling sections that alternate with jumps, downclimbs and slides in a beautiful sequence.

Hydrology: (machine translated)
Stream is often lightly flushed when the tanks of the aqueduct are cleaned, see inspections.

Access: (machine translated)
Just a few parking spots in Località Cendraro.
It is also possible to drive up to the chapel by car, however, the road is steep and narrow (not suitable for vans).

Approach: (machine translated)
Continue along the road, which soon becomes steep, narrow and graveled, to the chapel. Then follow the path to the bridge.

Tour: (machine translated)
On the right Ufter (ladder or rappel). A canyon as short as it is cute, continuous and never too closed.
Abseiling sections alternating with jumps, downclimbs and slides in a nice sequence.

Return: (machine translated)
Leave the stream via the right bank on the SS583. Hairpin bends back to the car.

As we were changing to go inside, the drain of a roadside tank was opened, which poured a lot of water into the creek, causing the flow rate to suddenly rise. The engineers assured us that the level would not rise any higher. The creek remains passable, so we went in and had no problems. We were told that this kind of operation is often done to clean the aqueduct tanks after rains. (machine translated)
