| <b>Summary:</b> (machine translated)<br>Final section of the Rio di Menta, aquatic, technically demanding, great ambience.  |                                    |                                   |
| <b>Hydrology:</b> (machine translated)<br>Only an emergency exit.   |                                    |                                   |
| <b>Access:</b> (machine translated)<br>We leave the SS 33 (Gravellona - Domodossola), which goes up the Ossola valley, through the Villadossola exit, we cross the Toce river first in an easterly direction, after 2.8 km we reach the village of Beura, here we turn left and after another 1.5 km we reach the village of Quarata. Here we take Via Quarata to the right and park the car near the stream.   |                                    |                                   |
| <b>Approach:</b> (machine translated)<br>On the road a few hundred meters north, before reaching the hamlet of Cosa, the trail branches off to the right and climbs steeply to San Lorenzo. Pass the chapel on the left, then turn right at the next fork and reach the ruins of the hamlet of Mura. We have now reached the canyon rim and follow the red arrows on a partly thorny path down to the stone bridge over the stream.                                 |                                    |                                   |
| <b>Tour:</b> (machine translated)<br>At the beginning it is first necessary to overcome a stone chaos. Then follow 2 rappels to the mouth of the left side stream Focia. Now begins a constant alternation of rappels, jumps, slides and of course downclimbing. Technically demanding is then a handrail on the steep rock to avoid a descent in the beam at C 25. After a few narrow passages, you finally rope into the swimming pool of the village of Quarata. |                                    |                                   |
| <b>Return:</b> (machine translated)<br>From the pool to the car.  |                                    |                                   |

Automatisch importiert von Descente-Canyon.com für Canyon Ogliana di Quarata DC. Super canyon qui mérite vraiment d'être fait. GPS nécessaire pour l'approche car il y a de très nombreux sentiers à la montée. Le RIC a du rééquiper partiellement le canyon car ajd il n'y a aucun point qui pose problème. Super toboggan de 25m qui n'engage pas vraiment (celui après l'etrotiture). 6h de voiture à voiture à 3. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2652/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Ogliana di Quarata The hike up is definitely worth it; for me, it's the most beautiful canyon of the week and at the RIC! We rescued a fire salamander. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2652/observations.html>)
