Specialities:

Gear:

Summary: (machine translated)
One of the biggest descents in the area and one of the first to be explored, back in 1998. It is a succession of waterfalls to save, with enough unevenness, that in period of rains loads with force, moment only for people with enough experience.
To keep in mind, it is necessary the combination of cars, quite long. Here will be "indicated" two options to climb to the headwaters, but it is better to opt for the safety of any Maps style app in case the state of the tracks changes.

Hydrology: (machine translated)
Yes, although not simple

Access: (machine translated)
We are in Mondoñedo on the A8, we leave to take the N634 and at the access to the north of Mondoñedo we take the LU160 towards Ferreira (north). In Recadeira, on the LU160, almost at km. 2 we have the detour to the left to the recreational area of Fervenza and Ferrería.
After crossing the bridge turn right, north to A Ferrería, park at the entrance where we do not disturb.
With the access car we have several options:
1.- Some guides indicate that from the recreational area we can follow that track towards Tronceda and then take a track that goes up to Monte Agudo (to the wind farm).
Another option, longer, but perhaps better for all types of vehicles, is to go by road to Tronceda and before arriving, look for a well trodden track that goes up to the wind farm.

Approach: (machine translated)
Virtually immediate

Tour:
Ver topo

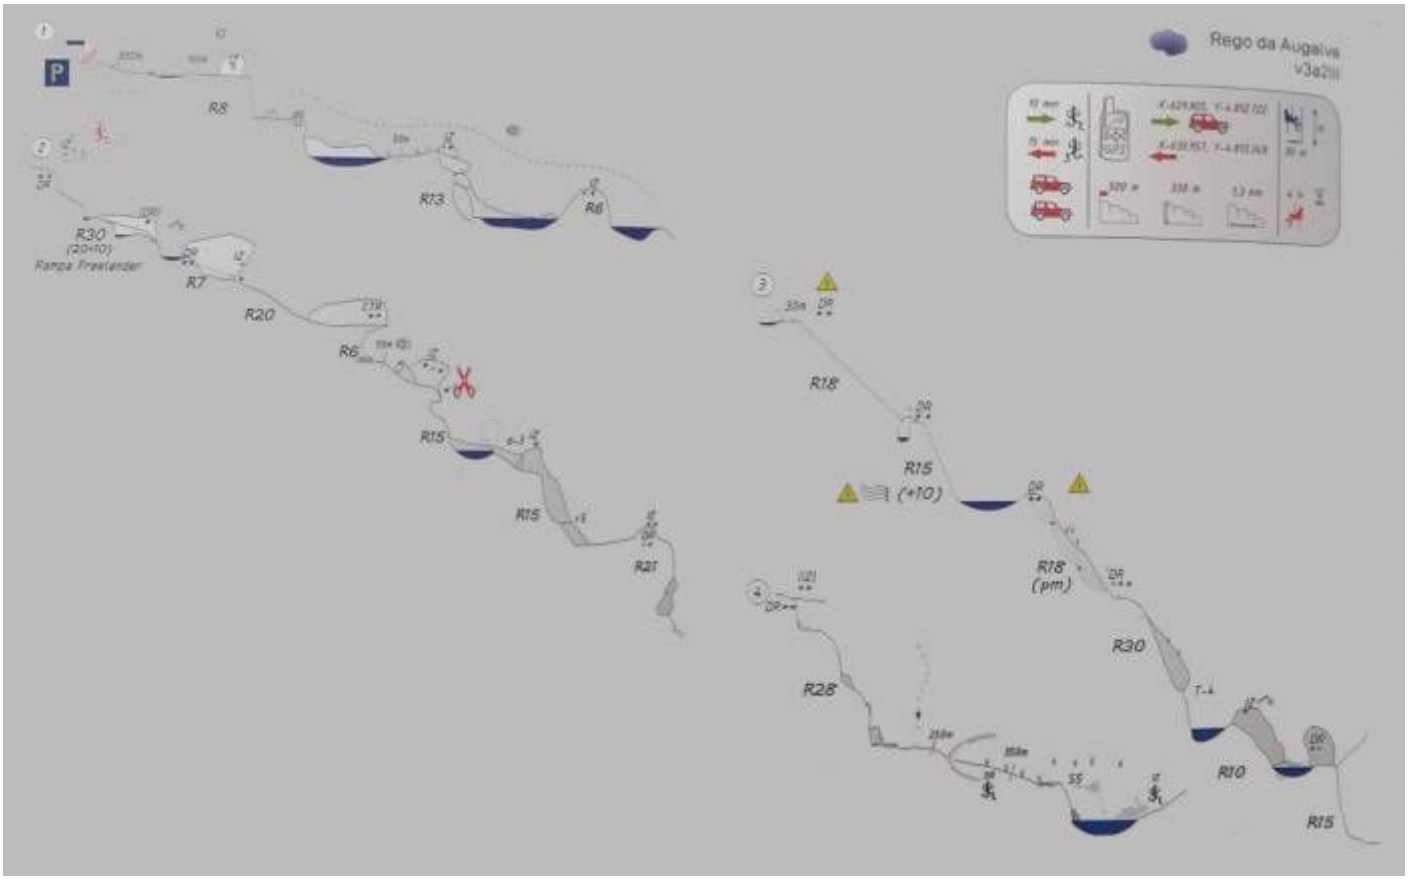

Return: (machine translated)
After the last jump, we turn left towards the village.

Coordinates:
Canyon Start 43.4286 -7.3639
