Country: España / Spain **Region:** Valenciana, Comunidad / Comunitat Valenciana **Subregion:** Valencia
Town: Tous

Difficulty: a little difficult	**Grading:** v4 a1 IV	**Total time:** 6h20
Approachtime: 20min	**Tourtime:** 3h	**Returntime:** 3h
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 500m	**Highest rapell:** 45m	**Amount rapells:** 3
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Collector canyon, only 3 rappels that will have to be climbed later, then you have to install in fixed and foresee it as such.or continue to the reservoir, to leave by the left slope to the top, where there is a track that will take us to the parking lot. It can be quickly combined with Pertecaste

Hydrology: (machine translated)
After the 20-meter rappel to the right towards the girdle.

Access: (machine translated)
We must be located in the village of Tous. We will arrive by the CV541 that we will follow straight ahead towards the dam of the reservoir.
Access to Pertecaste and Olla ravines
After almost 5kms from the village we will arrive at a detour, left to the dam that we will not follow and straight ahead by the path of Pollet-Terrabona. A kilometer and a half later we leave on the left a detour that goes down to the reservoir, we will continue on the right, on the upper part. After a sharp left turn at Puntal del Boj or de les Bruixes we will see the high tension towers in the background, about 300m before a track comes out on the left. We will go down this track about 200m and there is a track in worse condition on the right, we will go down it until we go down to the dry riverbed of the ravine, just before a hut. We will be able to park here

Approach: (machine translated)
Approaching the Pertecaste and Olla ravines
We will follow the dry riverbed for one kilometer through abundant undergrowth before reaching the first rappel.

Tour: (machine translated)
3 rappels that we will install in fixed to be able to go back up. After the last 44m rappel you can continue descending to the reservoir but you will have to equip the ramp. The return would be much longer and harder.

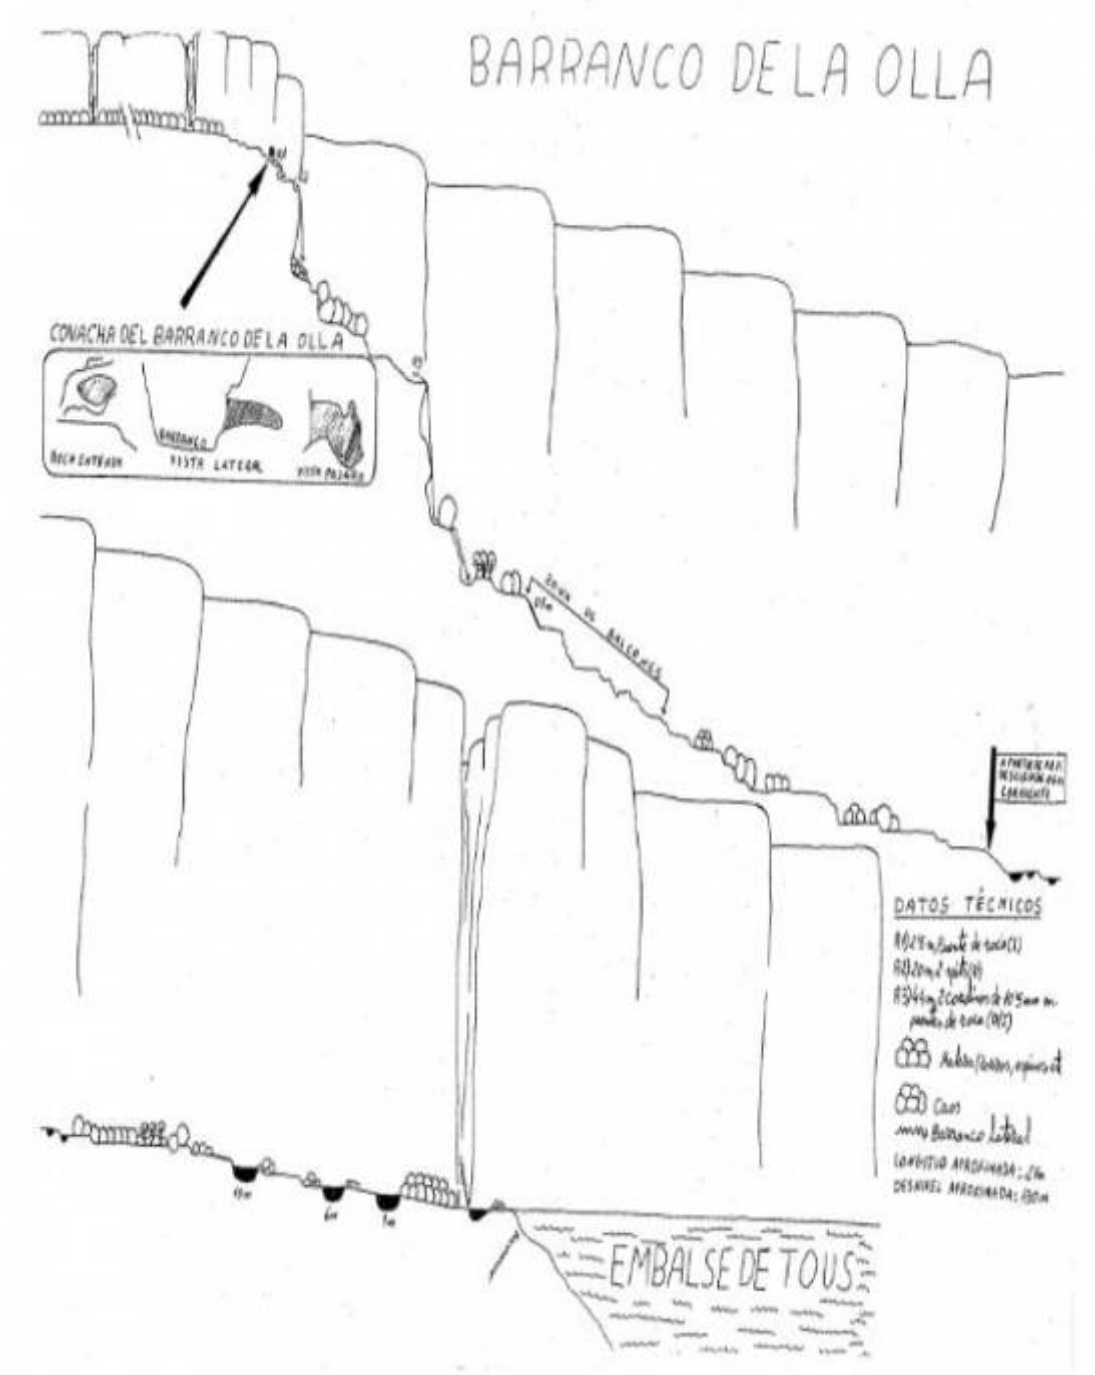

Return: (machine translated)
Going up the ravine, or after going up the last rappel, on the orographic right going towards the gorge, and climbing up it to the top and first rappels.

Coordinates:
Canyon Start 39.1972 -0.6667
