Summary: (machine translated)
Short but entertaining forest canyon

Hydrology:

Access: (machine translated)
In Geneva (after the border), we take the A 40 highway (Autoroute Blanche) in the direction of Lyon. We drive on this highway for about 75 km. We come to a highway junction and drive another 9 km in the direction of Lyon (A 42). Then we leave the highway and drive to Amberieu-en-Bugey. On reaching the outskirts of the town, we turn right onto the D 1075 (formerly the N 75).
After driving about 2 km in a south-westerly direction, this road turns left at an elaborately constructed junction in an easterly direction (straight ahead is the D 1084). We drive about 7.5 km, finally in a southerly direction, west past the village of Lagnieu. Immediately before the bridge over the Rhone, turn left onto the D 19 and continue along the orographic (!) right bank of the Rhone via Sault-Brénaz to Serrières-de-Briord (about 15 km from the Rhone bridge.
A few meters before this village we turn left uphill onto the D 32 and after another 4 km we reach the village of Bénonces. In the village, we turn right off the D 32 onto the D 87 in the direction of Seillonnaz. We pass the hamlet of Onglas and a few hundred meters later come to the road bridge over "our" stream. Park your car here.

Approach: (machine translated)
Above the bridge from the orographic. right side into the stream.

Tour: (machine translated)
Short but rewarding; suitable for "filling up" a day that has already begun (the Trefon-Pernaz and Cascades du Luizet canyons are in the immediate vicinity).
The belay for the last rappel is about 5 m back on a rock.
Prohibited in August and from November 1 to April 14, as well as in the stream area below the described descent.

Return: (machine translated)
Either leave ropes hanging in the Kleinschlucht and return here (can also be done without shunt and hand ascender) or at the exit of the ascent left up the slope above the Kleinschlucht on clear tracks back to the streambed above the Kleinschlucht.

Coordinates:
Canyon Start 45.8176 5.4922
Parking Entry and Exit 45.8177 5.4921
Canyon End 45.8155 5.4887

Automatisch importiert von Descente-Canyon.com für Canyon Arodin DC - Belle descente mais un peu courte. La C3 dans le 1er encaissement est bloqué par des embacles rendant impossible de faire un tobogan. C5 et C6 (saut et tobogan possible mais à sonder au préalable, notamment la C6). La sortie est bien indiquée et le sentier de retour est balisé par un marquage bleu. Attention aux barbelés (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/221/observations.html)
