Specialities:

Gear:

Summary: (machine translated)
Simple ravine, parallel to the Clot del Cortal, without great verticals, very dense and therefore with many remains of trunks in its route. It does not usually carry too much water except in the rainy season.

Hydrology: (machine translated)
Almost any time

Access: (machine translated)
We will take the C-17 to Ripoll, there we will take the C-26 and then the N-260 towards Sant Joan de les Abadesses, where a little more than a kilometer past the town we will take the C-38 to Camprodon.
Access to Bcos Cortal and Jaça
Once in Camprodon, turn left at the traffic circle to Setcases and Vilallonga de Ter, on the GIV5264. We will cross Llanars and at km. 4 we will find the detour to the left to Abella and La Roca. We will go up to Abellar, where two horseshoe bends await us, after the second one we will see a track that goes up the Riera de Abella, we follow it until just the bridge over the river, here we can park the return car or if we only take one.
With the access car we will continue along the track and after a kilometer, after a left curve, the track opens, place to park (Cap del Serrat).

Approach: (machine translated)
Access to Bcos Cortal and Jaça
From the Cap del Serrat we will follow another 2kms along the track to a cattle gate and continue walking, the first stream we will find on the right is the Jaça, the next would be the Cortal.

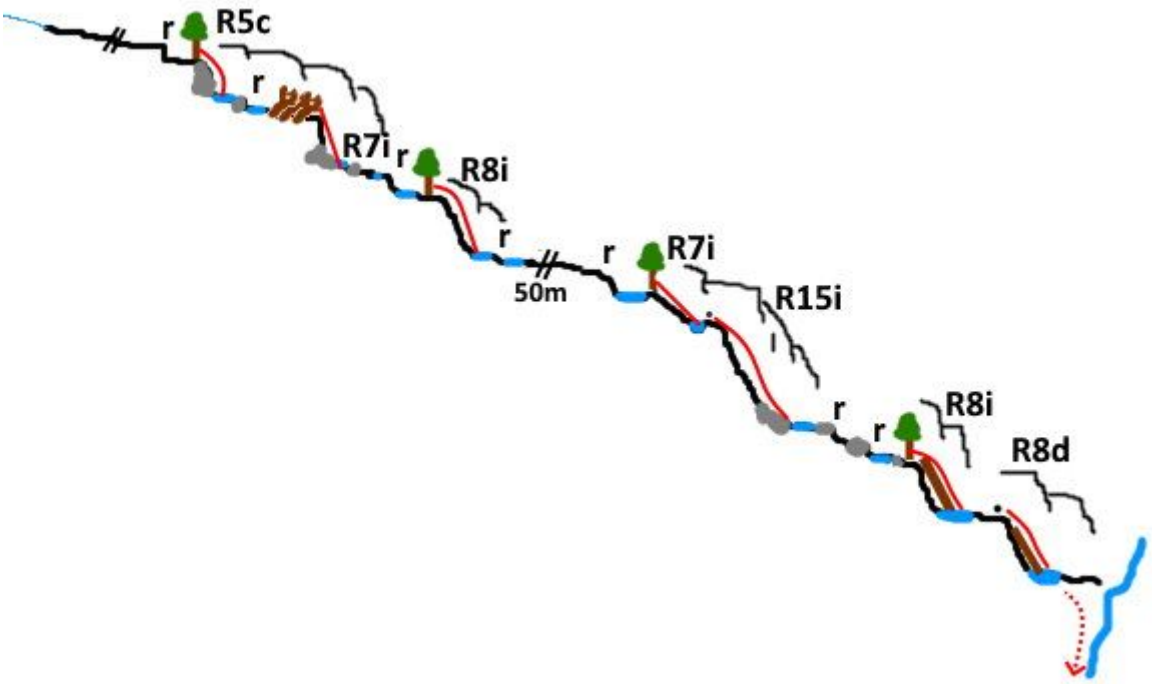

Tour: (machine translated)
Simple, with short rappels, not too deep pools, and plenty of boulders and skills.

Return: (machine translated)
Arriving at the Riera de Abella, we will follow it, as best we can, to the bridge of the car. About 2 kms
