Summary: (machine translated)
Simple spring canyon to be done when the rest of the area is going strong. First part open and without big verticals, the second part more technical with long rappels and a third part that is a water park, destrepes, slides, jumps...
Comfortable access and long but easy return, it can be shortened if we do not do the third part. Possible combination with the Aires river canyon, where this descent ends, although in that case we will do a really long activity.
It is better to avoid the summer because it will be dry and it loses interest.

Access: (machine translated)
We are located in Ainsa (N260), we will take the A138 towards France through the Bielsa tunnel. After a few kilometers we will pass through Labuerda and at pk57 we arrive at Escalona.
Here we will take the detour to Puyarruego/Fanlo, after 200m we will take the detour to the right to Puértolas and Bestué. We will follow this beautiful road through forests to Bestué and its small square.

Approach: (machine translated)
Follow the track heading north for 1 km until you cross the creek

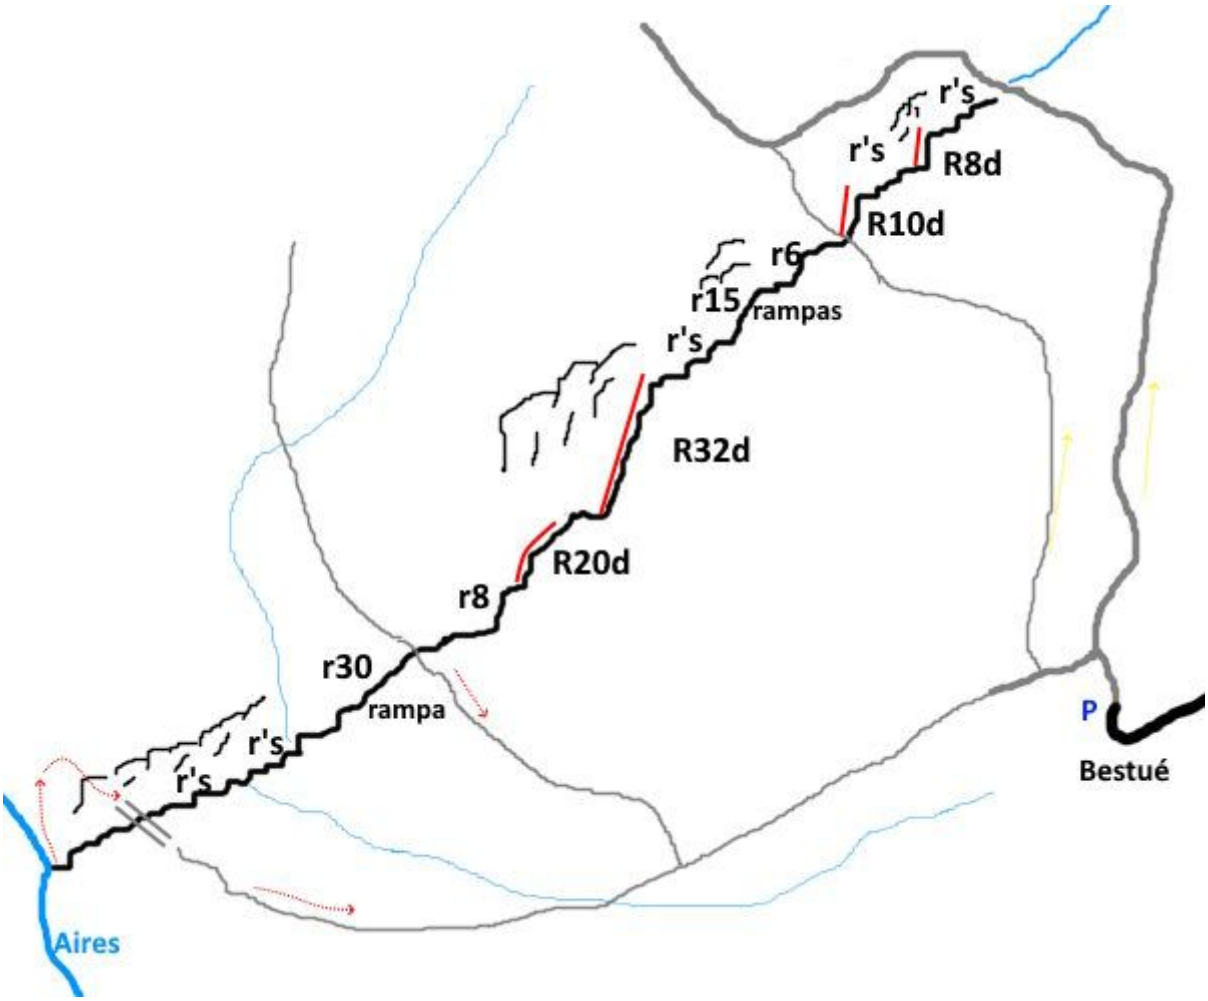

Tour: (machine translated)
Three parts, the first more open, the second more technical and the third a succession of slopes and slides.

Return: (machine translated)
We go back along the orographic left of the Aires river to take the path that goes up to Bestué.
