Summary:
Tras ser reequipado en el 2023, se convierte en uno de los descensos imprescindibles dels Ports.
El Coco Fondo es un descenso muy estético, continuado y divertido. A nivel paisajístico, destacan las vistas panorámicas al valle, los grandes arcos de roca y, como no, los cocos!. Se le llama “Coco” a las muchas badinas redondas y oscuras (por su profundidad) que encontramos a lo largo del descenso. Algunos badinas estan vacias, convirtiendose en marmitas trampa colgadas de las que se escapa facilmente gracias a los soportes instalados. El punto estrella es el rapel de 36m con los arcos, al qual le sigue un pasamanos de 12m sobre una gran badina.
Todas las pozas son evitable, ya que a lo largo del descenso hay instaladas varias cuerdas fijas para hacer rapeles guiados, pasamanos y tirolinas!, de esta manera evitamos caer en los “cocos”.
El retorno se puede hacer por la Via Ferrata del Coco de la Gotellera.
El Coco Fondo se puede combinar con otros barrancos muy próximos de la zona. Un clásico dels Ports és hacer la “Integral dels Cocons”, que agrupa 3 barrancos (Coco Fondo, Coco Extremera y Carroveres) y la Vía Ferrata del barranco de Coco de Gotellera.

Hydrology: (machine translated)
Cocó Fondo has three possible entrances/escapes, which allows you to adjust the duration of the descent. The (1) first entrance is the upper one, which corresponds to the head. (2)The intermediate one, right at the 2nd guided rappel, the one you descend from the natural of the pine trunk. (3)And the lower one, the one that crosses the path...

Access: (machine translated)
The access road by car is rocky and with some projections. On the map there are several parking lots marked along the road.
If you want to access the upper parking lot (marked parking 3 on the map), it is advisable to do it with an SUV or a car high enough to avoid the bumps. In this last stretch you have to go around a cemented overhang for drainage that is very steep, so it is very difficult to avoid a car rubbing against it.
You must take into account that the times of approach and return are valued from parking 3, so if you park further down, the time increases.

Approach: (machine translated)
In 2023 the access road has been conditioned, making an important work of signaling and clearing of the road.
The entire access trail is marked with signs in natural stone and red dots.

Tour: (machine translated)
The Coco Fondo is a very aesthetic, continuous and fun descent. The highlight is the 36m rappel with arches, which is followed by a 12m handrail to avoid a coconut.
The descent is continuous and entertaining, especially because there are fixed ropes installed for guided rappels, handrails or zip lines, which help us to avoid the pools easily.
It is convenient to carry a pulley for the guided rappels, so they are done more smoothly, as some of them are a bit horizontal. Although it is not essential. In the same way, it can be useful to carry a pedal to advance easily by the handrails, since at some point it is not possible to walk.
On the descent we also find hanging traps, which are easy to get out of thanks to the installed supports.

Return: (machine translated)
The return can be done by the Via Ferrata del Coco de la Gotellera. After rappel 18, we do not have to continue descending along the bed of the ravine, but we have to turn around and go up the bed. A few meters away we will find the Via Ferrata.
In this first section there are two variants: (1) The difficult option, which runs along the wall on the orographic right of the ravine; (2) and the easy option on the left side.

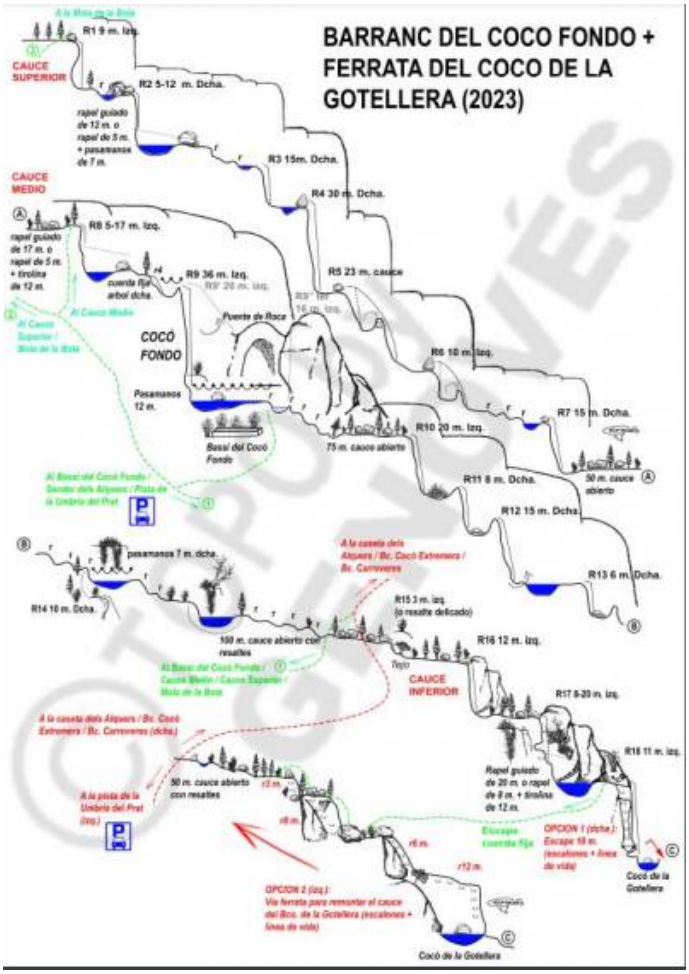

Coordinates:
Canyon Start 40.7477 0.2975
