Gear:

Summary: (machine translated)
Dry canyon except after heavy rains, not very continuous but quite beautiful. It is almost a collector's item

Hydrology: (machine translated)
In the excavated area no

Access: (machine translated)
On the N260 between Pont de Suert and La Pobla de Segur, at the height of Senterada we turn off on the L503 to Torre de Cabdella. Before reaching the Pobleta de Belvei the road crosses the river Flamisell by a bridge and just before the bridge there is a track in front. We park the car to return.
If we have the access car we go back to Senterada and take the detour to the right to Estavill (7kms), we will go up this road until 1060m after a sharp left curve we find an esplanade on the right with a path that goes down. Here we leave the access car.

Approach: (machine translated)
With a car, from the side of the bridge we will see a marked track/path that goes up to Estavill. This path crosses the road to the same area where we park the access car.
From there we will take the path that goes down to the river.

Tour: (machine translated)
It is a descent with very beautiful and boxed-in areas and open stretches of uninteresting walking. It is difficult to find it with water except after rain.

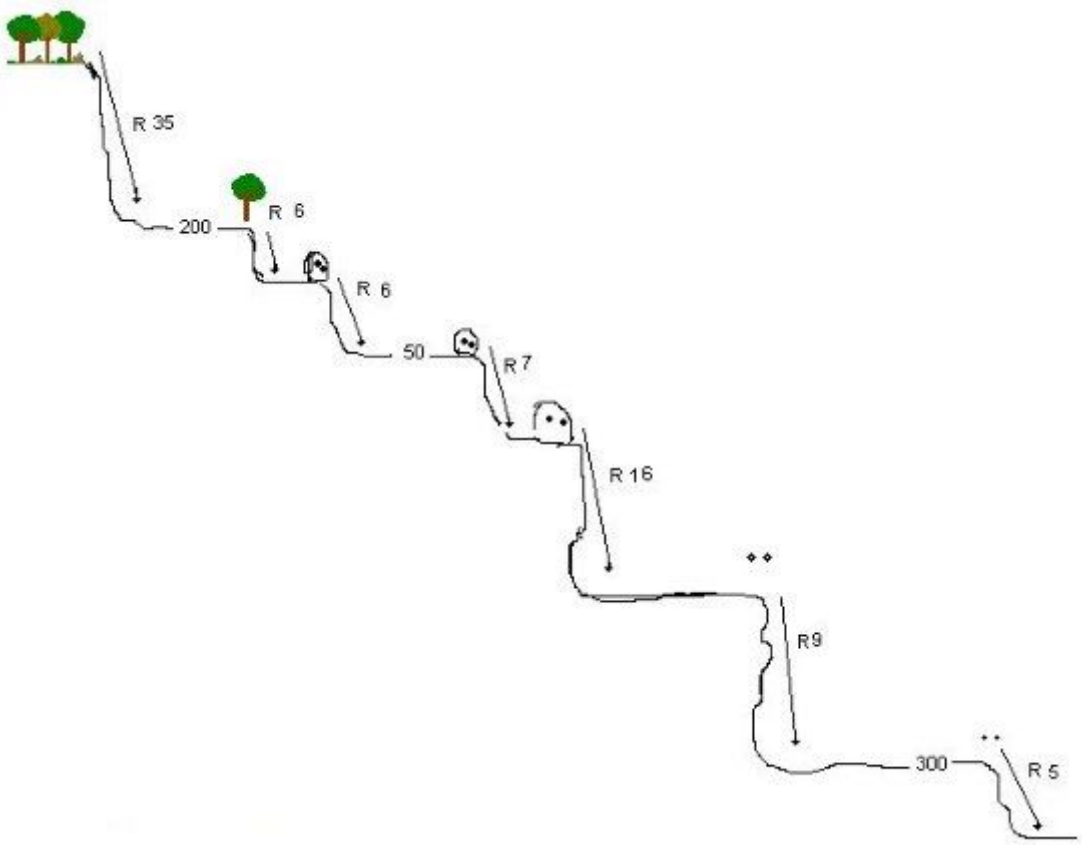

Return: (machine translated)
After the last rappel we will continue almost to the Flamisell, we will see a path on the right parallel to the river that turns into the track where we have parked.
