Punt Desch is the Flem bridge between parts I and II (entry Flem II into the large pool 20m below the bridge from the right-hand side, in winter rope in directly upstream of the bridge if necessary, the anchor comes after the 1m jump orog. on the left).

Return: (machine translated)

The return journey is made more difficult by the new FlemXpress. As of 01/2025 (still in test operation), it is not possible to take the lift directly down (neither Foppa nor Startgels). You have to ride all the way up to Nagens Sura to be able to ride all the way down again.

Be careful with tickets with a single ride to Startgels for access! Possibly no return journey possible. It is also not possible to buy a ticket to Nagens, as the gondola does not stop in Foppa/Startgels on the way! (An employee let us ride from Startgels to Nagens free of charge and we stayed in the gondola and rode down)
