Specialities:

Gear:
Ropes: 2x30

Summary:
Easy introductory tour that is a shorter (30') bike ride from Scharnitz and with less compromise. The bigger abseils (max. 25m.) have double, recent anchors (2022-2024). The smaller, often downclimbable passages have either 1 bolt or 1 abalakov as aid.

Hydrology:
Snowmelt, rainfall and karstic sources at the start and end of the canyon.

Access:
30' bike + 30' approach on the orographic right bank

Approach:
Park the bike by the bridge and hike up orographic right. The trail takes a wide turn to the left and away from the canyon (do not mistake it for smaller animal trails) and comes back to the canyon gradually through small bushes and pine trees. The trail is not marked but is rather obvious in its upper part.

Tour:
The tour starts well protected with a higher abseil and intermediate belay.
2 bolts L 12m to intermediate anchor
2 bolts L 14m to foot of the waterfall
1 bolt L 'Gemserast' 5m
1 abalakov R optional 6m

Added (double) anchors where previously there were none, also added more abalakovs to take away some of the exposure in the downclimbs. Would be great to add quicklinks for all 7 abalakovs.

Possible thunderstorms didn't allow for time to complete the anchors, just a quick visit to the canyon. Water levels seems rather stable throughout the year.

Having done all tours in the area, i was curious about the smaller canyons that are nowhere described. To my surprise there was no anchors, i completed the tour on abalakov or downclimb.
