Belay: ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)

Also known as Torrent de Pixavaques referring to the toponymy of its torrent.

It is a vertical torrent, little frequented, but very vertical and spectacular. Its last rapel of 60m with 45m of overhang is worth the effort.

Prepare your pruning shears and replacement material.

Hydrology: (machine translated)

Once you have descended the first vertical, you must continue downwards.

Access: (machine translated)

We are located in Sant Llorenç de Morunys and we will take the C462 towards Solsona.

We will cross the reservoir and at the p.k. 12 we have the access road to the dam, we will park here where we can park the return car.

With the access car we will return towards the dam and after crossing the second tunnel, on the right, p.k. 15,1, we have a track on the right hand side. 15.1, we have a track where we can park. If we take 4x4 we can go up the track 1 km to a flat.

Approach: (machine translated)

We will continue along the track for almost 2 kms until we reach the torrent, we will be on the first vertical with stunning views of the Cardener valley.

Tour: (machine translated)

A first rapel, there are 2 spits without a plate or from one on top, to access the vertical, where we have the first long rapel of about 45m. Then a wooded area with rappels that will take us to the second vertical. Here we will also have a first access rapel and then the long rapel of about 60m.

Return: (machine translated)

We will cross the Cardener to go to the access road to the dam, from here to the road
