Warnings:
Dry pools: Boiler trap (Marmita trampa)
Pools that either have no water or the water level does not reach the edge of the pool. Climbing out may therefore be impossible or at least difficult.

Specialities:

Gear:
Ropes: 1x40m

Summary: (machine translated)
Forest canyon for rappel.

Hydrology:

Access: (machine translated)
Coming from Rome, leave the A1 at the Ceprano exit. From Ceprano, take the N6 to Arce (7 km) and continue in the direction of Santopadre. A few hundred meters before reaching this village, turn left at an acute angle towards Fontana Liri. 2 km further on, turn right and then immediately left again onto Via Casale (signposted 'Loc. Santo Spirito'). About 1500 m further on, park the lower vehicle at the bridge.
Return with the second vehicle and drive uphill until you reach the Arce - Santopadre road about 150 m before turning left and descending through the forest to the bridge (upper parking lot).

Approach: (machine translated)
Below the bridge into the stream.

Tour: (machine translated)
The Santopadre is only worthwhile if there is sufficient water flow to jump the final pumps. Water flow at the entry does not guarantee water flow from the middle of the canyon.
If the final pools are not full - marmita trampa! Exit possible there and in the streambed or on the edge and back up again.

Return: (machine translated)
At the small bridge on the right we take the slope to the road.
