Summary: (machine translated)
Ravine that we access from the "village" of Bercuta with beautiful views over the Turia. Interesting in spring where it can carry a trickle of water, in summer avoid the hours of more sun. A lot of caution with the stones that we can go throwing down because it is quite decomposed and there are many frictions.

Hydrology: (machine translated)
To the right towards the GR7 that descends a few meters further on.

Access: (machine translated)
Take the CV35 to Chelva.
We go down to the recreational area of the Molino and continue along the small road that goes south. After a few kilometers we have the detour to the right to Bercuta. We will go to the village and park

Approach: (machine translated)
We will leave by the GR7 towards the Turia, at first as a track and when it will reach the cuts on the river becomes trail. When the trail begins to descend zigzagging cross a ravine, this is the time to access.

Tour: (machine translated)
Decomposed

Return: (machine translated)
When we get to the bottom we will go right to the GR7 to take the trail to go back up.

Coordinates:
Canyon Start 39.7494 -0.9953
