**Summary:** (machine translated)
Wild rappel canyon

**Hydrology:**

**Access:** (machine translated)
Take the A 1 (via Milan) or the A 21 (via Brescia) to Piacenza (southern exit). Take a bypass around the town to the south, then take the SS 45 through the Val di Trebbia via Bobbio to Marsaglia. Before the bridge, turn left onto the SP 586 ('Chiavari') and leave the car at about km 12 or 600 m after the end of Salsominore. 900 m further on, turn right at Ruffinati over the Aveto and up to Lisore. Here you cross the Rio Lisore below a water intake (exit upper parts, access lower parts).
Here you can take a look at the 30 m abseil point directly below the road. The entry point is where the Rio Lisore is crossed again (after 3.6 km) on the further ascent, and there is a suitable parking lot about 100 m further on in a bend to the right.

**Approach:** (machine translated)
cf. above

**Tour:** (machine translated)
Mostly open canyon in forest terrain, 'gravel slippage' (because a storm in spring 2001 deposited a lot of debris, so hardly any jumps are possible), not very attractive.
Better the lower parts from the road to the Rio Aveto.

**Return:** (machine translated)
At the mouth of the Aveto, cross it and meet the car parked below.
You can avoid swimming through the Aveto if you go up to the right after the exit until you can avoid the steep drop on the right above. In this case, the lower vehicle should be parked about 1.1 km after the Aveto bridge at Ruffinati.
