Specialities:

Gear:

Summary: (machine translated)
Simple canyon, open, not too entertaining and with water only after heavy rains. With short access and immediate return

Hydrology: (machine translated)
Yes, although the surrounding vegetation would hinder our progress to the access path.

Access: (machine translated)
By the AP2 or by the N240 to Vinaixa.
Take the LP7013 to El Vilosell, cross it and, after km. 8, we have a right turn with a track on the left to the Ermita de Sant Miquel de la Tosca. Follow this track to the end where there is a recreation area.

Approach: (machine translated)
Along the path that goes up to the Coll de Abellar. Path uphill that goes up through the forest. When you reach the signpost (about 25 min of ascent), take the path to the left and soon descend to the riverbed to find the first rappel.

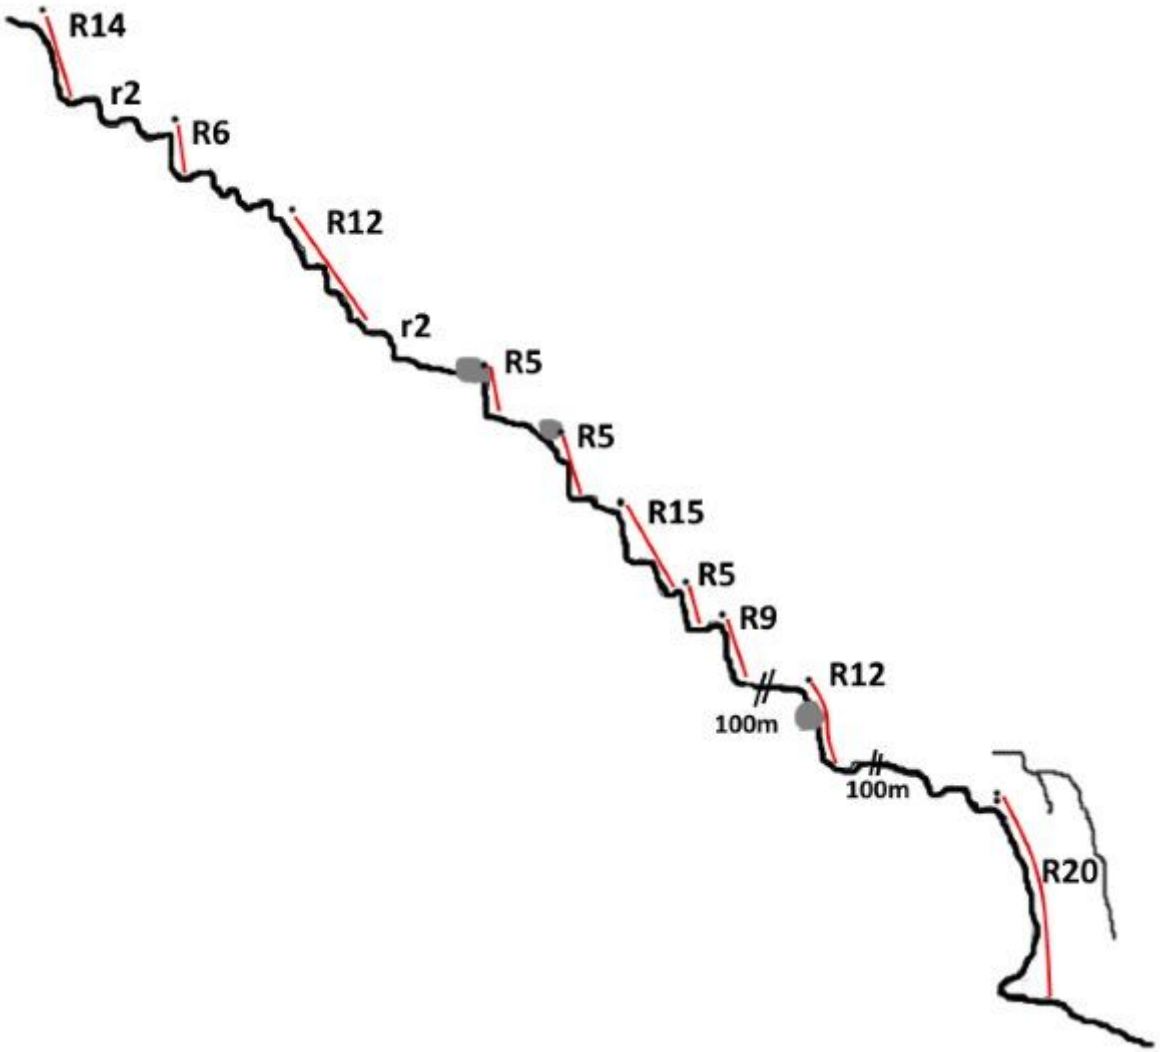

Tour: (machine translated)
It is an open descent with marmites that in many occasions can have stagnant water (to take into account) the rappels do not have too much substance except for the last one that leaves us in the parking lot.

Return:
Inmediato
