Vallon de Duranus

Duranus inf.

Create: 2023-03-09 20:52:13	**Update:** 2025-08-22 08:45:57	**Print:** 2026-11-10 02:11:02
Country: France **Region:** Provence-Alpes-Côte-d'Azur / Provence-Alpes-Cote d'Azur **Subregion:** Alpes-Maritimes **Town:** Duranus		
Difficulty: not as difficult	**Grading:** v3 a2 II	**Total time:** 2h5
Approachtime: 5min	**Tourtime:** 1h30	**Returntime:** 30min
Altitude entry: 380m	**Altitude exit:** 290m	**Delta Altitude:** 90m
Canyon length: 1200m	**Highest rapell:** 13m	**Amount rapells:** 5
Transport: on Foot	**Rock type:**	**Drainage area:** 6.00km²
Season: May - October	**Orientation:** West	**Best Time:**
Rating: ☆ 2.2 (2)	**Info:** ★ 2 (2)	**Belay:** ★ 3 (1)
Specialities:		
Gear: Ropes: 1x 30m		
Summary: (machine translated) Rappel canyon down to the Vesubie		
Hydrology:		
Access: (machine translated) On the N 202 from Nice in (northern) direction Digne. After 20 km, turn right and continue on the D 2565 up the valley of the Vesubie, not quite 10 km, until just before the village of St Jean la Rivière, the D 19 branches off at an acute angle. It leads us up to the village of Duranus (5 km after the turnoff). A little further down over the bridge, you will find space to park the car in the next left turn.		
Approach: (machine translated) Back to the road bridge and down on the right to the first rappel (10 m) into the stream.		
Tour: (machine translated) About 5 rappel, slide and possible jumps		
Return: (machine translated) The exit is about 100 m before the canal with plenty of water crosses the Vallon de Duranus. From the canal, a path leads up the orographic left flank to the D 19, which you follow to the left for 900 m to the car. You could also follow the path down to the D 2565, but it is not advisable to move vehicles, as parking on the D 2565 is extremely limited in the narrow canyon here and there is also a risk that the parked car will be broken into by the time you return. The Vallon de Duranus can be combined with the neighboring Vallon de L'Imberguet due to the short time required.		
Coordinates: Canyon Start 43.8906 7.2650 Canyon End 43.8904 7.2547 Parking Entry and Exit 43.8905 7.2650

Automatisch importiert von Descente-Canyon.com für Canyon Duranus Débit correct ++ Tout passe mais parfois bien arrosé. Dans ces conditions quelques ancrages supplémentaires n'auraient pas été un luxe, sur de petits obstacles casse patte qui se désescaladent mais ou l'eau pousse. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2476/observations.html)
