Summary: (machine translated)
Upper, commercially used part of the Verghello. Open forest gorge

Hydrology:

Access: (machine translated)
From Corte on the T(erritoriale)20 we drive about 16.5 km in the direction of Ajaccio. Immediately before the new road bridge over the Vecchio (the "Pont Eiffel" railroad bridge on the right), we turn right onto the D723, which takes us into the Verghello valley. Follow the narrow road to the bridge over the Verghello into the valley floor. This road is closed on days when there is an increased risk of forest fires.

Approach: (machine translated)
To the right of the bridge on the orographic left bank, ascend to a saddle and descend to the streambed on the other side.

Tour: (machine translated)
Several rappels & slides that need to be controlled. Not yet climbed by yourself.

We used a floating anchor at the point where all the water comes together (just before the C15), the rest of the canyon is no problem even when the water level is high. Pictures: Water level from the bridge, pool in front of the C15 and C15 from below (machine translated)
