Ropes: 2x 50m/ 1x20m

Summary: (machine translated)
3 High rappels (40m/45m/48m); limestone; nice view on the lake; short vertical canyon; mostly little water; south-facing; main waterfall visible from the road; canyon ends at the lake; some emergency exits.

The canyon is at high risk of rockfall. The gravel bed in the very shallow pools tends to go down as soon as you step on it in front. At the rappels, be careful not to step on the last bit of the gravel bed // to see if anything comes loose.

Hydrology:

Access: (machine translated)
From Torbole take the "SS45bis" through Riva and Limone, until "Prato della Fama". Here you park the car next to the road or at the parking lot at the small port in front of the tunnel. €5,- day parking ticket.

Approach: (machine translated)
About 10 min downhill (shuttle).
From the parking lot go back along the road. In the bend on the trail follow this downhill to the second path that branches off to the right. (If you are in front of a gate you have turned too early) Follow this downhill to the creek.

approx. 40min (on foot)
From the parking lot behind the Surfspot/ Pension (Café) you walk up the very steep hiking trail 260 next to the Limonenhang (very steep scree path) --> you cross the old Roman bridge where you can already have a look into the creek --> after approx. 20-25min. there is a bend with 2 signs (on the right Parto Bella della Fame 15min, on the left wooden sign with a small path) --> down the path on the left (view level) --> from here descend on the right along the poorly visible path to the stream (entry at approx. 280HM).

Tour: (machine translated)
Short climbing passage to the rappel approx. 5m --> immediately after follows an approx. 30m rappel --> rappel 3m (slippery!) --> kl. climbing passage --> shortly after follows a C10 and C25 --> nice view of the lake --> highest rappel with 48m (arrival basin not visible) --> le emergency exit possible --> kl. rappel through thorn bushes approx. 4m (kl. Basin) --> immediately following a C40 (arrival basin not visible) --> short walking passages with left exit possibility (wooden railing) --> right 20m rappel slightly overhanging with step --> very slippery --> C40 on 2 steps divisible (2x20m or 1x40m) with clamping block (twisted and. Now you are under the Roman bridge (ascent path or emergency exit right) --> further rappel over narrow chute C20 in grotto --> after the rock arch comes a 5m climbing passage with fixed ropes on the left side for the further descent. Then there is another 3 meter step that we rappelled from the fixed ropes. (Here mMn. a anchor and a second fixed ropes are missing). After a short walking passages you get out of the canyon in front of the road on the right. (Here you can refresh yourself in the lake) (67Hm).

Hydrology: Two days after heavy rain (about 20 l/m²) water level low.

Return: (machine translated)
Exit on the right by the bridge. Along the road back to the parking lot.

Alternatively, out into the lake and back along the beach.

Vertical canyon with a beautiful view of the lake, the last 3 rappels are also beautiful in a more forlorn environment and carved into the conglomerate (machine translated)

We were traveling in a large group of 10 people and it took us a total of 4 hours. Stalls all great. Unfortunately a lot of garbage in places (machine translated)

The water level was relatively high, photo of the water level at the beginning under the bridge. Nevertheless, it was easy to walk, in most cases you had to be sure-footed and deliberate up to the edge, then you were behind the waterfall when rappelling. Be extremely careful of falling rocks! At this high water level, some rappelers were flushed down with stones every second, which were shot far out by the water pressure! (machine translated)

One day after heavy rain; no problems on the tour, but upper limit in terms of water. Scenic and highly recommended! (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Baes Super canyon avec une vue magnifique sur le lac mais pas flippante, que du plaisir visuel. Avant la C47 il y a une C8 et une C25 (debut partie 2) et après la C47 je dirais une C37 (attention au risque de coincer la corde mais elle se remonte en rive gauche). Compter plutôt 18-20 cascades en tout (pas 14). Parking aval: pas vraiment le choix, au port et payant (2€ de l’heure). Marche d’approche raide mais belle. Une bonne option: laisser un collègue en haut avec tous les sacs et monter en maillot de bains. En haut le GR débute dans un virage, 100m après sur la droite il y a un parking. Canyon à faire absolument si on est dans le coin. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2611/observations.html)
