Summary: (machine translated)
A ravine of relative interest, without large abseils and only with water during the rainy season. Some people say that you can go up completely by the sides if you go down to the Sil, but this statement is not clear. Otherwise it would be necessary to foresee boat as in Trabancas.

Hydrology: (machine translated)
To be reviewed!!!

Access: (machine translated)
Situated in the Ribeira Sacra, we must focus on Nogueira de Ramuín (Luíntra).
From there we will leave by the OU-0508, towards the monastery of Santo Estevo and its parador, after 5kms we will pass it, we leave it on the left. We follow the road to Loureiro and 5km later Cerreda on the left, we continue a couple of kilometers more to Vilouxe/Cimadevila, on our left, shortly after we have the Columna viewpoint and then the Cabezoas viewpoint where we will park.

Approach: (machine translated)
Following the high tension cables, we will go down to the riverbed.

Tour:
