Specialities:

Gear:

Summary: (machine translated)
Entertaining descent with plenty of slides and skills in an enviable environment, narrow, lonely, surrounded by nature and high mountain landscapes.
Caution with the spring flows because with the thaw they have to be very high and dangerous.

Hydrology: (machine translated)
Possible in open areas with caution

Access: (machine translated)
We are located in Ainsa (N260), we will take the A138 towards France through the Bielsa tunnel. After a few kilometers we will pass through Labuerda and at pk57 we arrive at Escalona. We will continue towards France passing through Lafortunada until the detour to the valley of Chistau/Gistaín (A2609).
We will follow the road towards Plan/Gistaín until we reach San Juan de Plan, we will pass it and at the first sharp bend to the left there is a track straight ahead. This track takes us to Biados (Posets-Maladeta Park panel).
We will go up the track for about 10kms until we reach Es Plans, where there is a campsite and the campsite on the left, we pass it, we make a left turn and in the next right turn there is a track that goes up to the Tabernés refuge. This track is not always in good condition for cars. If we can we will go along it to the free refuge (good place to spend the night).

Approach: (machine translated)
From the refuge by the path that goes down to the Cinqueta river.
We will follow this path Pr HU114 to the pluviometer (end of the ravine). Here we can go on either side until almost the plan of Culfreda. At the height of the ravine of Culfreda we enter the riverbed.

Tour: (machine translated)
Beautiful descent, perhaps a little short for such a long way, with precarious facilities due to the conditions of the descent. Caution with the passage of the cat in case of high flows.

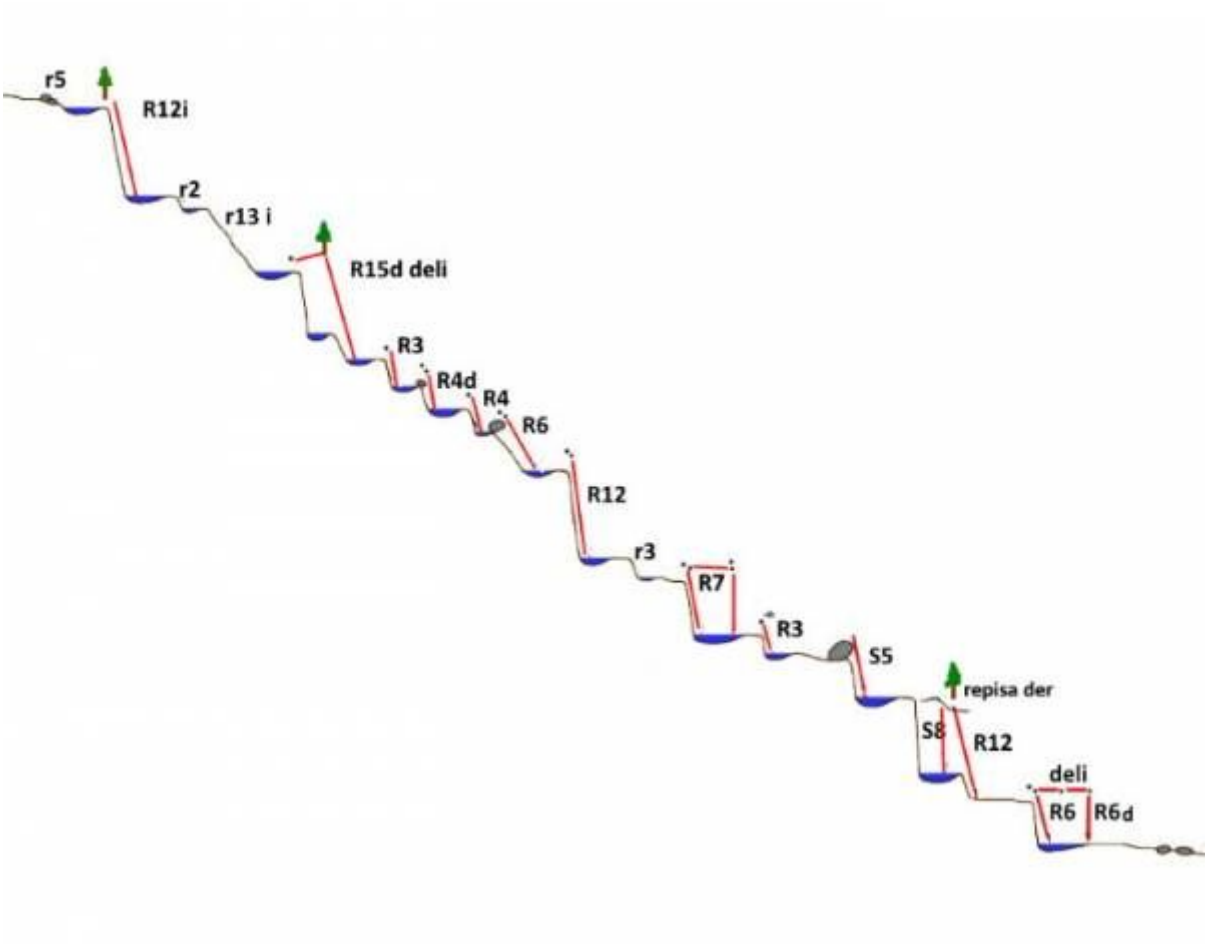

Return: (machine translated)
We will reach the plain of the rain gauge
