Summary: (machine translated)
Permission must be requested from the town hall to make the descent. In summer there are forest rangers controlling.

Hydrology:
Sí

Access: (machine translated)
We will leave Sant Llorenç de Morunys towards the Llosa del Cavall dam, which we will cross. We will continue along the road until we find a traffic circle, where we will leave towards Solsona. We will find a STOP and again we will take a left, direction Berga. We will continue along this road C-26 and we will pass Navès. We will turn left onto an asphalted track indicating the Vall d'Ora. Then we will find that the track becomes a dirt road and GR-1. We will continue with the car until we find an open field on the right and the riverbed on the left. Here we will leave the car and we will get into the river.

Approach:
Inmediata

Tour: (machine translated)
This canyon is a great chaos. It has a multitude of holes, siphons and narrow passages. It always carries water. Be careful in spring and after the rains we will find it in live water. If we descend it with strong flow, we will have to avoid many of these passages.
The first meters run along the riverbed until we find the beginning of the chaos. We will have the possibility of making multiple combinations. The chaos does not allow us to try different options, a multitude of holes where we will enjoy if the flow allows it.

Return: (machine translated)
At the end of the chaos we will find a cairn on the left that leads us to the road, and through this we will return to the car in 20 minutes.
