Summary: (machine translated)
Collector canyon with only 3 abseils

Hydrology:
Si

Access: (machine translated)
We are located in Millares towards Bicorp on the CV580.
At pk 45, just at the top of the hill there is a road to the left by the Camaro. Soon we will find a detour to the right that we will not take, we will always continue south along the reservoir. When the track becomes impassable except 4×4 we will be approaching the descent to the Escalona reservoir and we will have the Duende ravine on the left. We can go left on this track worse until the end there are some olive trees and a dilapidated hut.

Approach: (machine translated)
We will follow the house's ridge and after about a kilometer we will turn left into the ravine.

Tour: (machine translated)
Not too interesting. A couple of interesting rappels and nothing more.

Return: (machine translated)
At the last rappel we will stay in the girdle and exit to the right. At 300-400m we exit to the right and climb the spur. Then we will only have to follow the ridge to the access.
