Specialities:

Gear:

Summary: (machine translated)
Together with its brother the Sallent de Bertrans, they continue along the torrent of Puig, making the longest descents in the area. A little frequented descent but recently reinstalled the incredible first rappel.

Hydrology: (machine translated)
Impossible in the vertical

Access: (machine translated)
Location Val d'en Bas
We must be located in Falgars d'en Bas.
From San Esteve d'en Bas on the C153 southbound, we turn off at Els Hortalets, cross the village and go southbound on the local road. After 500m we have the detour to the right to La Coromina/Falgars. We will go up to Falgars.
If we go from the south from Rupit by the C153, in the pk 34 we have a curve where the detour to Falgars comes out.
Once in Falgars we go down the Falgars stream and continue, we pass the Mas de Pujols and arrive at L'Hostalot and head towards the Mirador de Matxos. We park here.
If we have two cars, we can leave the other one at the exit of Els Hortalets near the Torrent del Puig.

Approach: (machine translated)
Val d'en Bas ravines
It is obvious, we go down to the riverbed from the bridge.

Tour: (machine translated)
Vertical descent with a first rappel with a handrail to save the cirque, then it smoothes out.

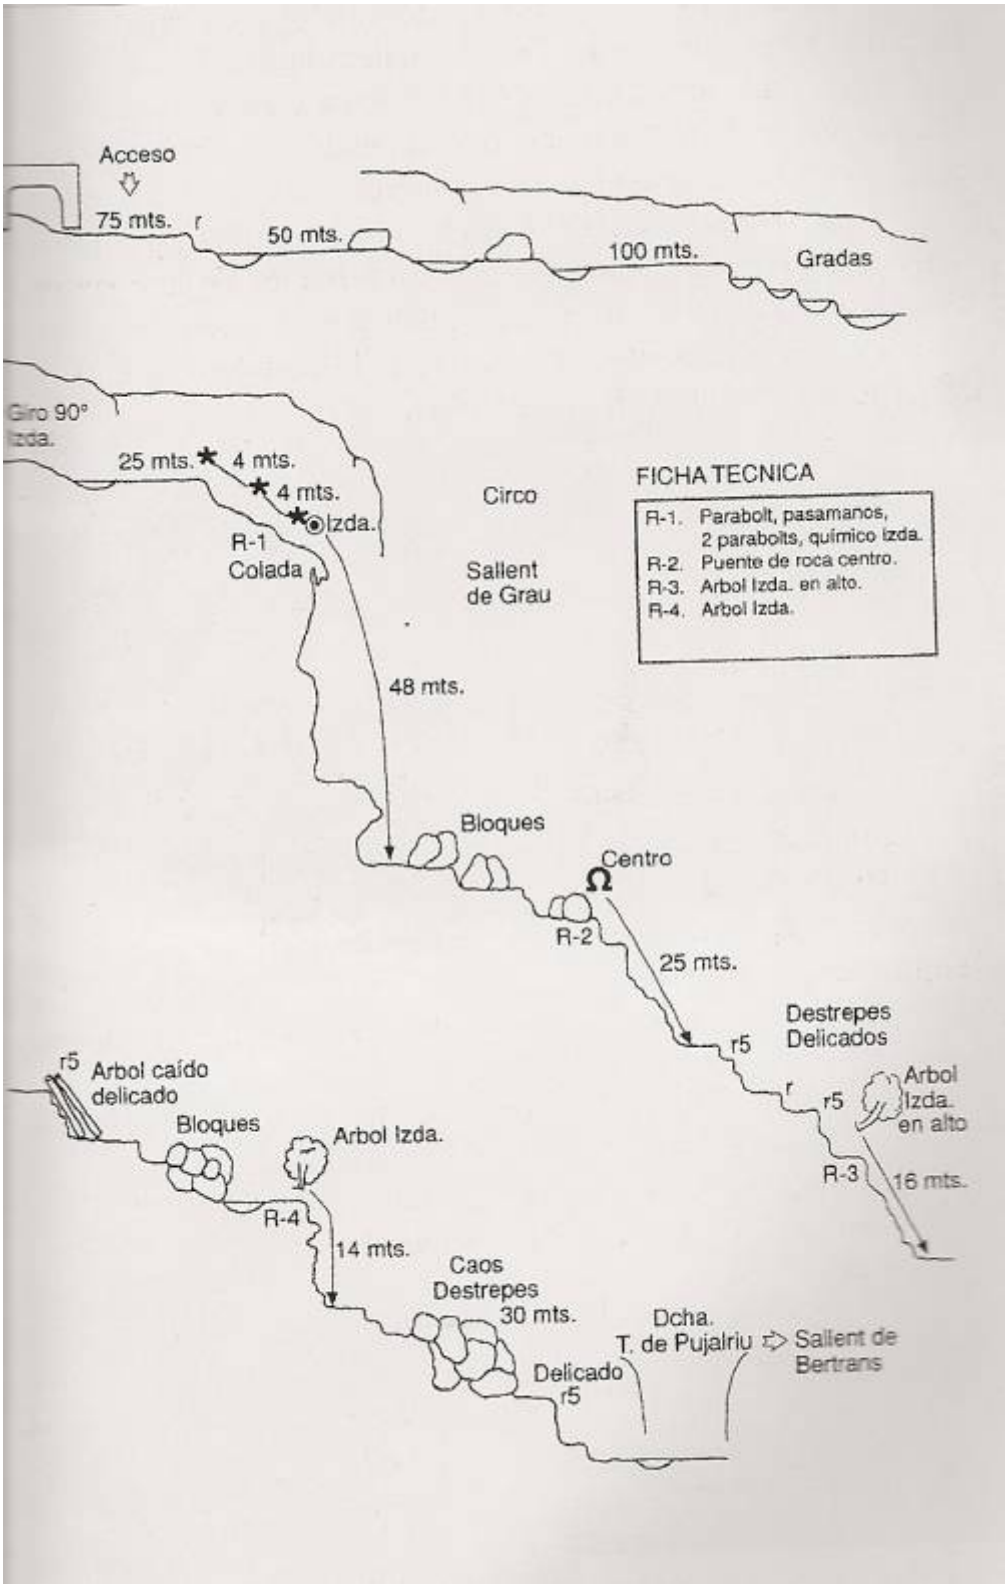

Return: (machine translated)
After the confluence with the Bco Bertrans we can go halfway down the slope to the right in search of the path that goes along the rope to the top.
Another option is to follow the riverbed until we find a path that goes down the Torrent to the road (option two cars).
