Country: France **Region:** Occitanie **Subregion:** Ariège **Town:**		
Difficulty: not as difficult	**Grading:** v2 a3 II	**Total time:** 1h
Approachtime: 10min	**Tourtime:** 45min	**Returntime:** 5min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 500m	**Highest rapell:** 8m	**Amount rapells:** 2
Transport:	**Rock type:**	**Drainage area:** km²
Season: June - August	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Gorgita embedded, very aesthetic, short and quite aquatic. Perfect to combine with the Calie waterfall or even extend the day of Ossèse.

Hydrology:
Sí

Access: (machine translated)
Cascade de Calie, Ossèse Inf and Ossèse Sup
We have to go to the parking of the Cagateille circus, for this we arrive at Saint Girons and go up the Salat river until we reach Oust and by the D3 we pass by Seix and Moilin Lauga until the detour (on the left) to Ustou by the D8. Pass through Le Trein and turn right on the D38 to St Lizier and continue to Stillom. At the bridge that crosses the river to Cagateille we must continue straight on to Ossèse. We make a couple of right turns and at the next left turn (we will have left some farms on the right) we have the bridge over the Ossèse. We can park in a hole before it.

Approach: (machine translated)
From the farms, on the orographic left side of the river, a path goes up to the next farms, where there is a track and the bridge under which we will pass, we continue along this bank, along a small track to the next houses (100m) and we will see a footbridge, a place to access the riverbed.

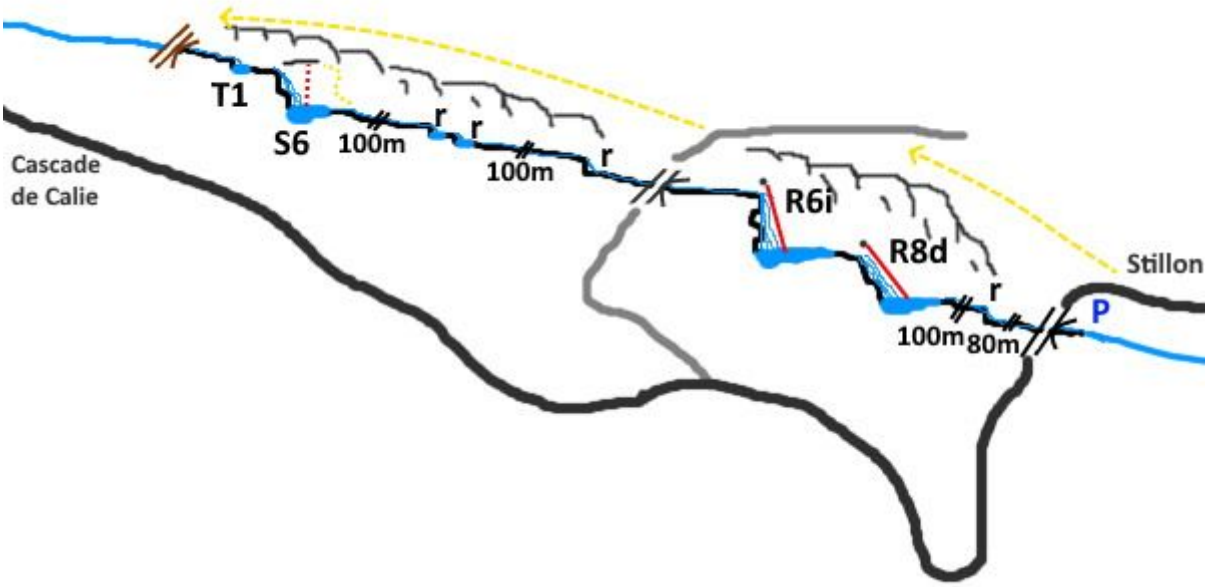

Tour: (machine translated)
Short but very interesting descent, a small gorget to continue after the bridge in another one a little bit more excavated with two rappels.

Return: (machine translated)
We arrived right at the road bridge
