All good! Top stands. Some gravel in the canyon. (machine translated)

Beautiful tour. All anchors in order and easy to reach. At the intermediate belaystation you should not rappel into the pool but only to the belaystation (right about 4m above the pool). (machine translated)

Nice tour, good stands. It was fun...highlight is definitely the high rappel with intermediate stand:) (machine translated)

It was fun... really nice. Nothing to complain about. Significantly less frequented than the lower one. (machine translated)

Were in the canyon today with a bit more water. All stands top. No problems at all. (machine translated)

Beautiful canyon. All the stands are tip top (machine translated)

Superiore to climb and a great tour in between. On the last big rappel (20m + 20m), the "Sauschwanz"/diverter is broken on the lower one and the orographic left stand (dry chain anchor) must always be checked for real usability, but there is a glued anchor on the right. As usual, you can find a video of the tour on Instagram at <https://www.instagram.com/reel/Dla0VltA9Cg/?igsh=MXdndHM2ZHvsc3Jqcw==> (machine translated)

Super grip, nice flow. Only downfall are the pools that are with gravel and the occasional rock surprise in the reception. Optimal with morning to midday sun.

Only a small remnant of ice. (machine translated)

Still snow and ice in the canyon. However, ascent possible without any problems. Stands all top, easily accessible and ice-free. (machine translated)

Anchorages all good. The canyon is heavily gravelled and there is still a lot of rock transport in the water. Beware of falling rocks in the waterfalls (machine translated)

2024-06-20 | Mats Vancraeynest | ★★★★★ | ☰ ★★★★ | ⚓ ★★ | ⚓ Normal | ⚓ Emergency exit

Bit higher water level then normal but very doable. Took exit after r65 after unexpected weather. It was good signaled and doable to exit

Automatisch importiert von Descente-Canyon.com für Canyon Rosengartenschlucht (obere) Nice, challenging canyon. Flow a little high, but not too much. Equipment in decent state, except for 1 of 2 bolts in the last anchor. The nut is loose and the bolt is partly uncovered. Can be avoided by doing the last two rappels combined. All three
