Summary: (machine translated)
Beautiful and alpine canyon in the waterfall of Romedo in the Vall de Cardós, a classic for people experienced in high flows.
Regulated canyon (Parc Natural de l'Alt Pirineu in Lleida)
To request authorization: https://parcsnaturals.gencat.cat/ca/xarxa-de-parcs/alt-pirineu/gaudeix-del-parc/consells/regulacio-activitats/index.html

Hydrology: (machine translated)
On the right bank after R11

Access: (machine translated)
By the N260 to Sort, once there we turn off on the C13 to Llavorsi.
In Llavorsí, just at the entrance, after the bridge we turn right onto the L504 to Alins/Ribera de Cardós/Tavascán following the river Cardós, a wide and magnificent valley. After almost 4kms we will have a traffic circle, we will continue on the left to Tavascan.
Cross the village and continue towards the Vall de Cardós up the river Lladorre to the Montalto dam and park.

Approach: (machine translated)
We will continue along the path of Pla de Boavi going up the Lladorre river until we reach a bridge that crosses it to go up to the refuge of Broate (end of the descent). At this point we will have a path on the left (orographic right of the Romedo) that following some milestones will take us to the Romedo dam. At about 1700m altitude the trail approaches the river, we will access it.

Tour: (machine translated)
Fairly open ravine with a spectacular setting and a good flow until well into the summer. In spring, in general it is usually impossible due to the thaws. Rappel without too much difficulty

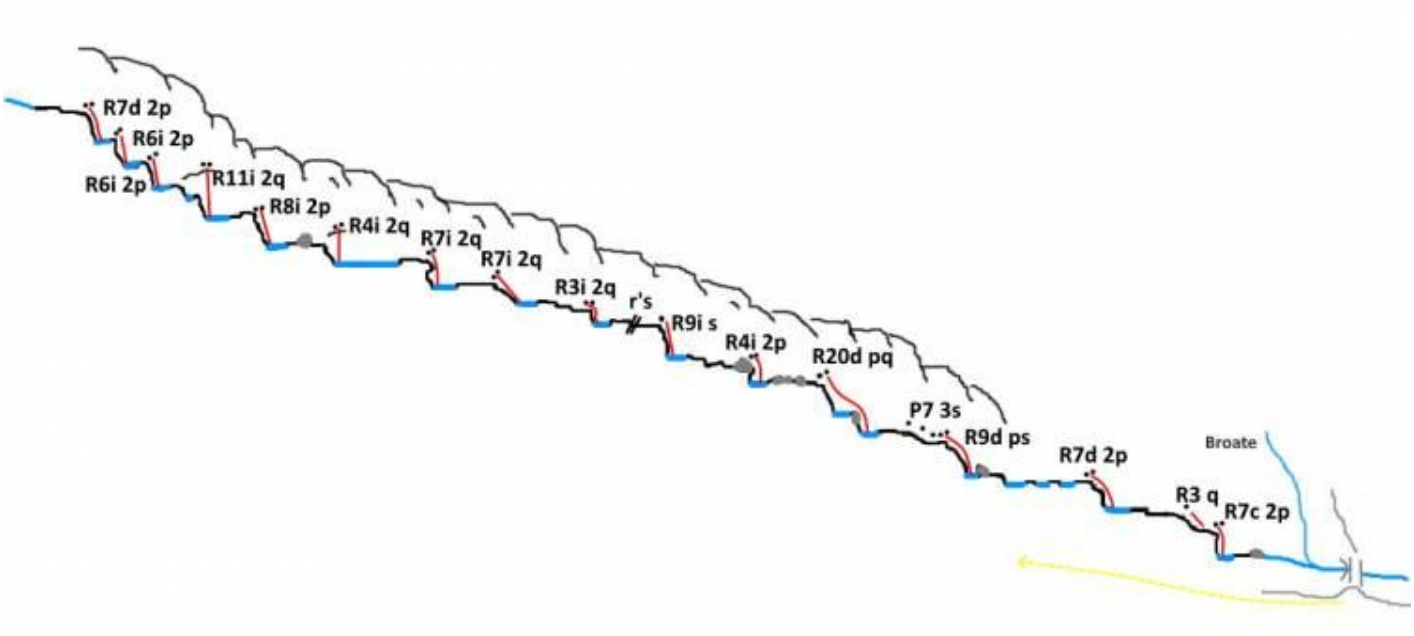

Return: (machine translated)
We will arrive at the bridge where we have turned off, we just have to retrace our steps.
