Summary: (machine translated) Raw data import from Ropewiki https://ropewiki.com/Lizerne_de_la_Mare Canyon in two parts, the first is similar to the one in Flims, but less interesting. The second part is a bit more involved and incised, but not the prettiest limestone. (machine translated)		
Hydrology: (machine translated) Most of the water you see at the parking lot comes from a spring, the stream itself hardly carries anything.		
Access:		
Approach: (machine translated) Cool hiking trail up through Poteu du bois.		
Tour: (machine translated) The canyon has 2 parts, with a walking passage in between. At the top it is more open with beautifully polished waterfalls, and a great gulch with more angular rock.
