#### Gear:

Ropes: 2x 60m

**Summary:** (machine translated)

Short rappel canyon, usually with little water

## **Hydrology:**

Access: (machine translated)

From Geneva, take the A40 highway for about 65 km in the direction of Lyon. After 3 short tunnels, you pass the small town of Nantua (on the right below a high viaduct) and then drive through a tunnel about 3 km long. We take the next highway exit and come to St. Martin du Frere. From here we head south on the D 12 (Route de Condamine). After 13 km we turn left onto the D8 and after another 11 km we reach the village of Hauteville-Lompnes.

From here, take the D9 in the direction of Col de la Rochette, Ruffieu. After about 2 km uphill, we come to a road bridge with a stone cross nearby. We park the car here.

#### **Approach:** (machine translated)

Above the bridge (from the guardrail) rappel into the stream and down to the culvert.

## **Tour:** (machine translated)

The long rappel is 57 m if you rappel through, 16 + 45 if you take the intermediate belay at the natural bridge. Here the anchor on the natural bridge did not look very safe (2011).

#### Return: (machine translated)

Either immediately after the high rappel half-left take the path up to the road or the next 3 steps (each 5 m) further down in the stream, then pathless left up until you meet the path up.
