Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 3 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Barranco del Centenario or Zucaina or El Chorrador, is a very famous canyon for its long rappel of 68m divided into 20 + 48m. Cold water canyon
NOTE June 2020: 3 more rappels have been enabled after the bridge to extend the descent by almost an hour (R10 + R6 + R17). The return would be 5min as it would end under the bridge where we have the car below. Before it was always done with a combination of cars, but now there is a "path" that from the car below leaves you at the head of the ravine in 40 minutes (very steep... it is 1.5 km with 200m of vertical drop...).

Hydrology:
– TODO –

Access: (machine translated)
We must take to the town of Zucaina in Castellón. At the height of the pk 35 of the CV190 we will leave the exit car. We continue along the road towards Zucaina and about 4kms later (just after passing the milestone of pk 39), after finishing the curves, there is a forest track on the right. This track takes us to the Molino del Villar, before arriving we park.

Approach: (machine translated)
With two cars access is immediate from the mill.
If we go with a car, from the parking we will take the path that goes to the Chorrador, we will go up a path on the orographic left before the chorrador, quite steep, overcoming 200 meters of unevenness in 1.5 km. The path is not very marked.

Tour: (machine translated)
It starts open with some short abseils and rappels and then closes and enters the waterfall area.

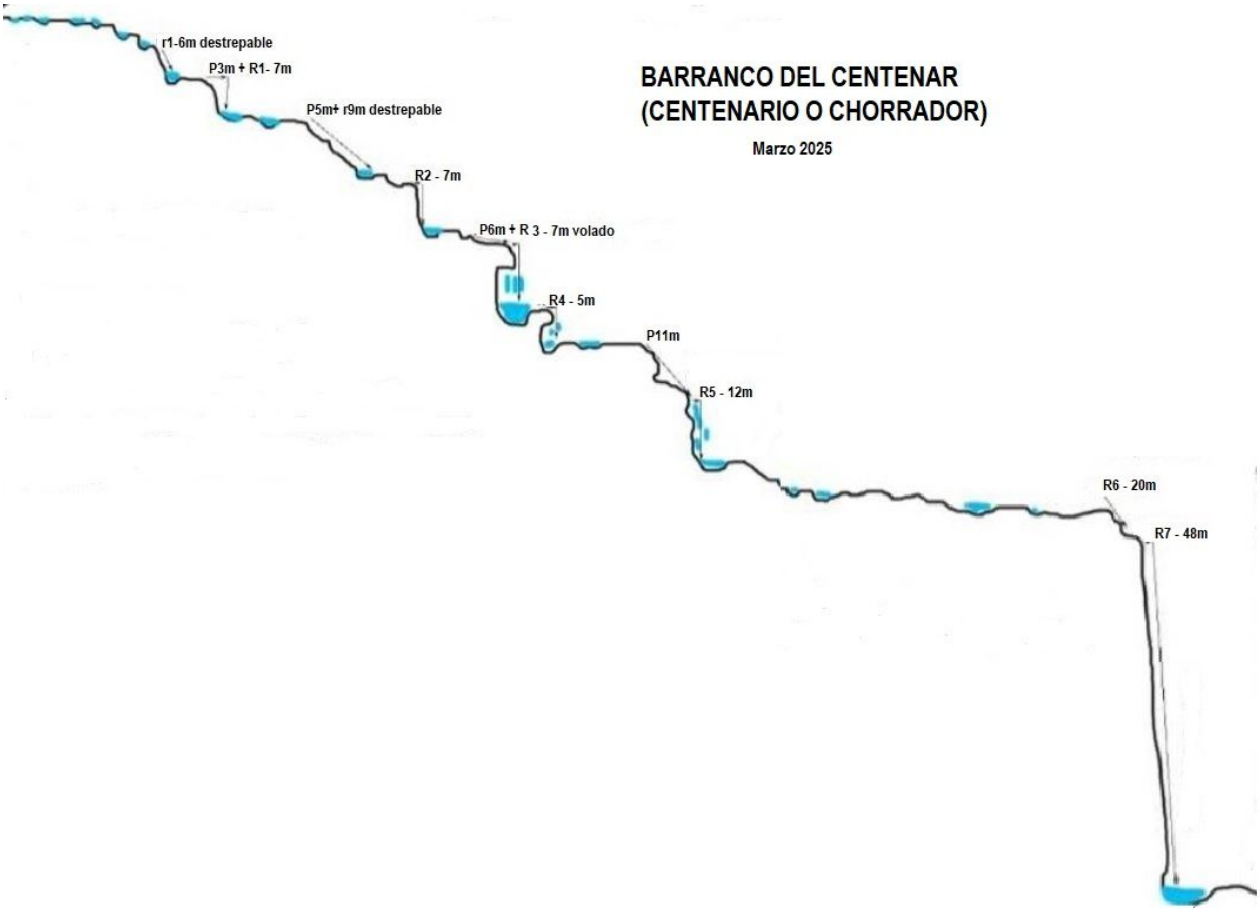

Return: (machine translated)
Road on the right that leaves us on the bridge where we parked.

Coordinates:
Canyon Start 40.1384 -0.4056
Unknown 40.1351 -0.4017
Unknown 40.1385 -0.4056
