Specialities:

Gear:

Summary: (machine translated)
Simple canyon next to the Aran Valley that will allow us to start in this world. Three rappels of up to 15m without major difficulties and with very comfortable access and return.

Hydrology: (machine translated)
Difficult due to the fact that the descent is quite steep.

Access: (machine translated)
From the Val d'Aran on the N230, we pass into France on the N125.
Arriving in Fos, at the big traffic circle, we turn right onto a track to le Seriail. Park at the fork.

Approach: (machine translated)
We continue straight ahead at the fork on a path that goes towards the stream and crosses it. We go up the creek to about 690m and here we find a tree marking the beginning of the descent.

Tour: (machine translated)
Easy descent with only 3 rappels. Be careful, it is quite slippery

Return: (machine translated)
We reached the bridge on the way up.
