Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 5 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Torrent equipped, dry except after heavy rains. It is little frequented although it has a pretty nice access either by the Pla de les Baterias or by the Coll de Garrigoses. The final part is the most interesting so it is usually accessed by Garrigoses to get rid of the initial part of the climbing.
After the Gr de Feixades there are a couple more rappels of up to 20m to reach the road.
Prohibited from March 1st to July 31st.
Regulated Descent: https://muntanyamontserrat.gencat.cat/ca/el_parc/canals-i-recorreguts-equipats/

Hydrology:
Difíciles

Access: (machine translated)
We must be located in Collbató in the heart of Montserrat.
Once in the village we will go to the Cova de Salnitre to a picnic area near the Ermita La Salut where we will park.

Approach: (machine translated)
We go down to the village to the street Pau Bertran to turn right on the Drecera from which a path goes up to the viewpoint of Far Gari. Follow the PR (white and yellow marks) flanking the wall to the dry stream.
Another option is to climb left to the Senyera below the Roca Lisa. There we turn right along the PR to also flank the wall to the torrent and the Font Seca.
Once at the Font Seca we follow the path of the Cami Vell de Collbató to Montserrat and when we reach the Pla de Bateries we can continue straight ahead to the head of the stream or turn right to the Coll de Garrigoses.

Tour: (machine translated)
A first part of destrespes and then rappels of up to 10m without great difficulty but in a quite beautiful environment. When we reach the GR we can continue and do two more rappels of up to 20m or go out on the GR.

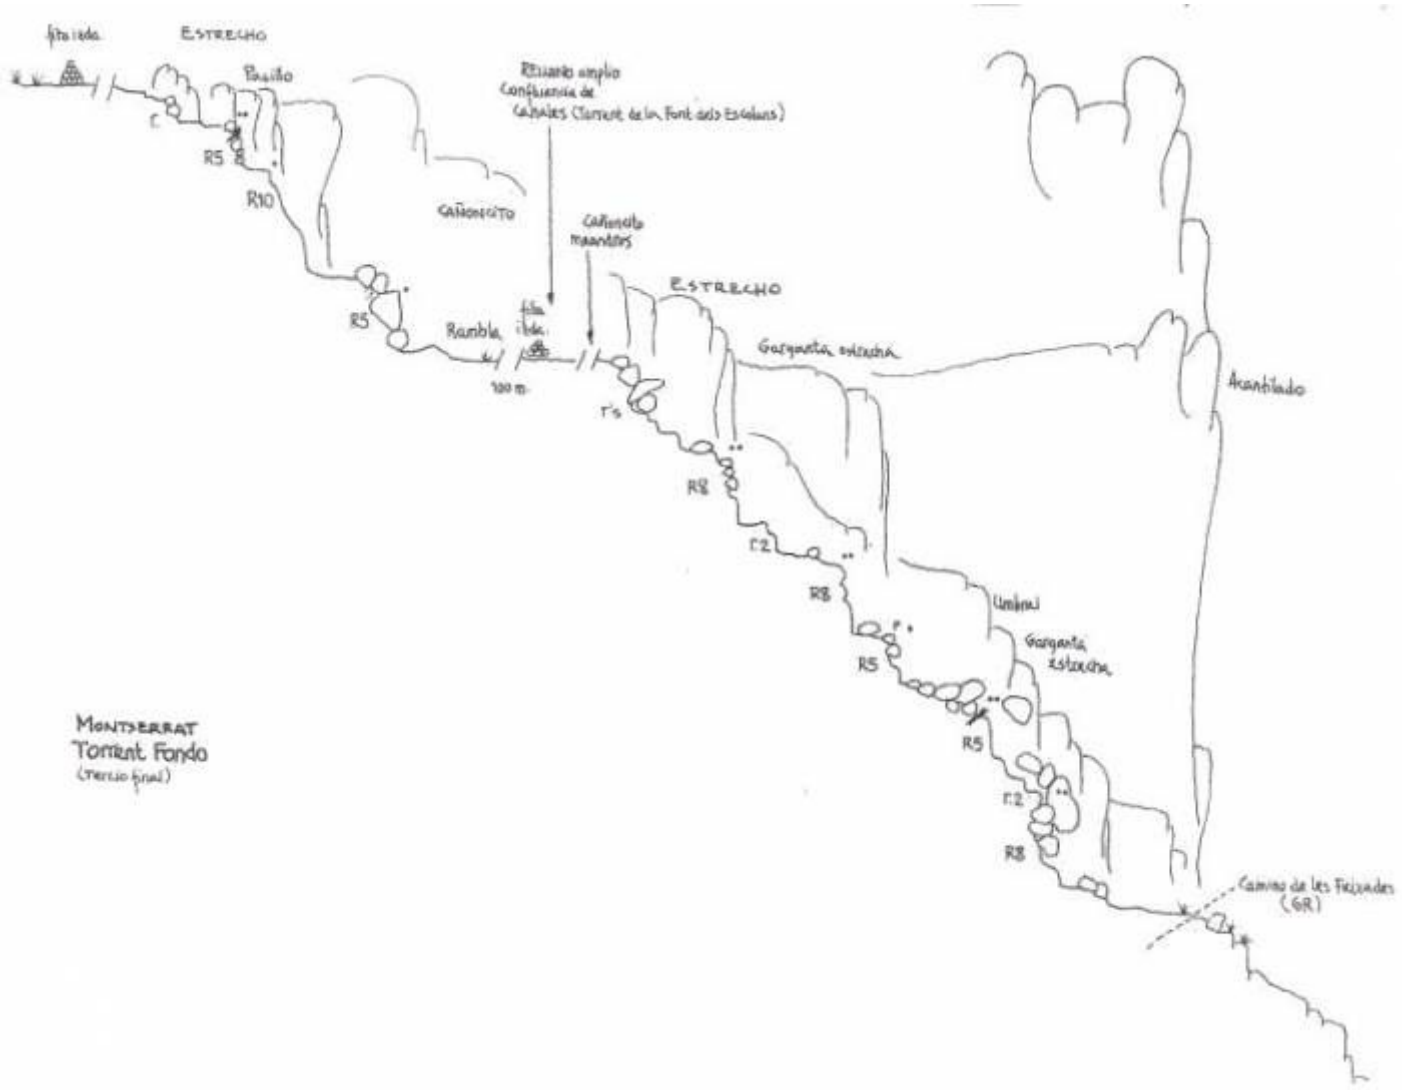

Return: (machine translated)
When we get to the GR we turn right and it leads us to the Cova del Salnitre and from there to the hermitage where we park.

Coordinates:
Canyon Start 41.5733 1.8296
